

DIN EN 13779:2007-09 (E)

Ventilation for non-residential buildings - Performance requirements for ventilation and room-conditioning systems

Contents		Page
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	7
4	Symbols and units	9
5	Agreement of design criteria	10
5.1	General	10
5.2	Principles	10
5.3	General building characteristics	10
5.4	Construction data	11
5.5	Geometrical description	11
5.6	Use of the rooms	11
5.7	Requirements in the rooms	12
5.8	System requirements	13
5.9	General requirements for control and monitoring	13
5.10	General requirements for maintenance and safety of operation	13
5.11	Process from project initiation to operation	14
6	Classification	14
6.1	Specification of types of air	14
6.2	Classification of air	16
6.3	System tasks and basic system types	21
6.4	Pressure conditions in the room	22
6.5	Specific fan power	23
6.6	Heat recovery	24
7	Indoor environment	24
7.1	General	24
7.2	Occupied zone	25
7.3	Thermal environment	27
7.4	Indoor air quality	28
7.5	Indoor air humidity	30
7.6	Acoustic environment	31
Annex A (informative) Guidelines for Good Practice		32
Annex B (informative) Economic aspects		60
Annex C (informative) Checklist for the design and use of systems with low energy consumption ...		61
Annex D (informative) Calculation and application of Specific Fan Power Calculating and checking the SFP, SFPE, and SFPV		64
Annex E (informative) Efficiency of ventilation and air diffusion		71
Bibliography		72
