ISO/IEC 16512-2:2008-05 (E)

Information technology - Relayed multicast protocol: Specification for simplex group applications

Contents

Page

1 Scope 1

2 Normative references 1

3 Definitions 1

4 Abbreviations 2

5 Overview 2
5.1 RMCP-2 entities 3
5.2 RMCP-2 protocol block 4
5.3 Simplex delivery model of RMCP-2 5
5.4 Types of RMCP-2 messages 5

6 Protocol operation 6
6.1 SM's operation 6
6.2 MA's operation 8

7 RMCP-2 message format 18
7.1 Common format of RMCP-2 message 18
7.2 Control data format 20
7.3 Messages 21

8 Parameters 44
8.1 Data forwarding profile 44
8.2 Parameters used in RMCP-2 45
8.3 Encoding rules to represent values used in RMCP-2 46

Annex A - Tree configuration algorithm 49

A.1 Bootstrapping rule 49
A.2 Neighbour discovering rule 50
A.3 HMA selection rule 51
A.4 CMA acceptance rule 51
A.5 Parent decision rule 52
A.6 Tree improvement rule 53
A.7 PMA's kicking-out rule 53

Annex B - Real-time data delivery scheme 54

B.1 Overview 54
B.2 IP-IP tunnel mechanism for RMCP-2 real-time data delivery 54

Annex C - Reliable data delivery scheme 56

C.1 Overview 56
C.2 Operation 56
C.3 Data encapsulation format 58
C.4 Data profile 58

Annex D - RMCP-2 API 59

D.1 Overview 59
D.2 RMCP-2 API functions 60
