Bibliography 20

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 The role of the Document Semantics Renaming Language 2
4.1 Namespace 2

5 DSRL maps 3

6 Mapping user-defined names to schema-defined names 3
6.1 Reassigning element and attribute names 3
6.2 Mapping attribute values 5
6.3 Default attribute values 6
6.4 Mapping element content 6
6.5 Default content 6
6.6 Renaming processing instruction targets 7
6.7 Mapping entity references 7

7 Declaring entities 8

8 Conformance 9

Annex A (normative) Validation of declarative document architectures 10

A.1 RELAX NG XML Schema for Validating DSRL 10
A.2 RELAX NG Compact Schema for Validating DSRL maps 15
A.3 Schematron Rules for Validating DSRL 16

Annex B (informative) Using DSRL to Transform Document Instances 17
