

# ISO/IEC 26908:2009-11 (E)

## Information technology - Telecommunications and information exchange between systems - MAC-PHY interface for ISO/IEC 26907

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Conformance .....	1
3	Normative references .....	1
4	Terms and definitions .....	1
5	Notational conventions .....	1
6	Abbreviations and acronyms .....	2
7	Overview .....	2
8	Interface Signal Description .....	3
8.1	Interface Signal Definitions .....	4
8.1.1	Control Interface .....	4
8.1.2	Data Interface .....	5
8.1.3	CCA Interface .....	5
8.1.4	Management Interface .....	5
8.2	PHY Operational State .....	6
9	Registers .....	6
9.1	Bit Ordering and Interpretation .....	6
9.2	Register Address Spaces .....	6
9.3	Static Parameter Definitions .....	7
9.4	Static Parameter Coding .....	11
9.5	Dynamic Register Definitions .....	14
9.6	Register Map .....	16
9.7	Register Set Access Timing .....	17
9.7.1	Transmit Control Registers .....	17
9.7.2	Receive Control Registers .....	18
9.8	TONE-NULLING MAP CONTROL .....	18
10	Frame Structures .....	19
11	Interface Theory of Operation .....	24
11.1	Overview .....	24
11.1.1	PHY Reset Protocol .....	25
11.1.2	Exit from Sleep State .....	25
11.1.3	Normal Operation .....	26
11.2	Frame Timing .....	26
11.3	Ranging Support .....	27
11.4	Transceiver Delay Definitions .....	27
11.5	Transceiver Turnaround Times .....	29
11.5.1	RX-TX Turnaround Time .....	29
11.5.2	TX-RX Turnaround Time .....	29
11.6	PREAMBLE CONTROL .....	29

11.6.1	Single Frame Transmission and Reception .....	29
11.6.2	Burst Mode Transmission .....	30
11.6.3	Burst Mode Reception .....	31
11.7	Transmit Operation .....	31
11.7.1	Data Bus Ownership .....	31
11.7.2	Single Frame Transmission Control .....	31
11.7.3	Burst Mode Transmission Control .....	33
11.7.4	Burst Mode Transmit Error Recovery .....	34
11.8	Receive Operation .....	34
11.8.1	Data Bus Ownership .....	34
11.8.2	Single Frame Reception Control .....	34
11.8.3	Burst Mode Reception Control .....	37
11.8.4	Burst Mode Reception Error Recovery .....	37
11.8.5	Zero Length Frame Reception .....	38
11.9	MAC Transmit Abort .....	38
11.10	MAC Receive Abort .....	39
11.11	Error Conditions .....	39
11.11.1	Transmit Error Conditions .....	39
11.11.2	Receive Error Conditions .....	40
11.12	Clear Channel Assessment .....	41
11.12.1	CCA Interface Signals .....	42
11.12.2	Operation of the CCA Interface .....	42
11.13	Management Interface .....	43
11.13.1	Management Interface Signals .....	43
11.13.2	Operation of the Management Interface .....	43
11.13.3	Examples .....	45
Annex A (informative) Electrical Specifications .....		47
A.1	I/O DC Requirements .....	47
A.1.1	3,3V DC Specification .....	47
A.1.2	1,8V DC Specification .....	47
A.1.3	1,2V DC Specification .....	47
A.2	MAC and PHY Timing Specifications .....	48
A.2.1	PHY Signal Timing .....	48
A.2.2	MAC Signal Timing .....	49
Annex B (informative) PHY Vendor and Version Coding .....		50
B.1	PHYID Format and Coding .....	50
B.2	PHY Version Format and Coding .....	50
