## Graphic technology - Spectral measurement and colorimetric computation for graphic arts images

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1 <b>Scope</b> .....		1
2 <b>Normative references</b> .....		1
3 <b>Terms and definitions</b> .....		2
4 <b>Spectral measurement requirements</b> .....		4
5 <b>Colorimetric computation requirements</b> .....		8
6 <b>Measurement data reporting requirements</b> .....		15
<b>Annex A (normative) Sample backing</b> .....		16
<b>Annex B (informative) Computation of the CIE 2000 total colour difference (CIEDE2000)</b> .....		20
<b>Annex C (informative) Geometry</b> .....		23
<b>Annex D (informative) Fluorescent samples</b> .....		26
<b>Annex E (informative) Improving inter-instrument agreement</b> .....		27
<b>Annex F (informative) Certified reference materials (CRMs)</b> .....		29
<b>Annex G (informative) Special cases: Use of polarization</b> .....		31
<b>Annex H (normative) Test method for UV-cut conformance</b> .....		32
<b>Annex I (informative) Procedures for widening the bandwidth</b> .....		34
<b>Bibliography</b> .....		36
