

ISO/IEC 29143:2011-02 (E)

Information technology - Automatic identification and data capture techniques - Air interface specification for Mobile RFID interrogators

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Conformance	2
3	Normative references	2
4	Terms, definitions, symbols, abbreviated terms, and notation	3
4.1	Terms and definitions	3
4.2	Symbols	5
4.3	Abbreviated terms	5
4.4	Notation	5
5	Overview	6
6	Transmitter	6
6.1	Introduction	6
6.2	Mobile UHF Transmitter	6
7	Media Access Method	10
7.1	General Approach	10
7.2	Collision Detection	10
7.3	Command Retransmission (Mandatory)	17
7.4	Random Wait Time (Mandatory)	19
7.5	Practical Implementation	22
8	Tag Memory	22
8.1	General	22
8.2	Data Structures Dedicated to Mobile RFID	22
8.3	Data Exchange between Interrogator and Tag	24
9	Extended Command Set	25
9.1	Overview	25
9.2	Flex_Query(optional)	25
Annex A (informative) Communication Collisions		28
Annex B (informative) Pseudo-Code Notation of the Collision Resolution Algorithm		30
Annex C (informative) Example: Random Wait Time Adaptation		32
Annex D (informative) Random Wait Time Application Examples		34
Annex E (informative) Mobile RFID Application Family Identifier		36
Annex F (informative) Examples of Minimum and Maximum Wait Time Definition		40
Bibliography		42
