ISO/IEC TR 29181-3:2013-04 (E)

Information technology - Future Network - Problem statement and requirements - Part 3: Switc hing and routing

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Abbreviations 3

5 Background 4
5.1 Main features 4
5.2 Rationale for a new paradigm 4
5.2.1 Appropriateness for today's traffic 4
5.2.2 Addressing and scalability 5
5.2.3 Security 5
5.2.4 Complexity of routing hardware 5
5.3 Migration 6
5.4 Structure of this document 6

6 Requirements 6
6.1 Introduction 6
6.2 Classes of flow 7
6.2.1 Minimising complexity 7
6.2.2 Synchronous flows 7
6.2.3 Asynchronous flows 9
6.3 Addressing 11
6.4 Security and accountability 11
6.4.1 Privacy, trust and traceability 11
6.4.2 Corruption of data units 11
6.4.3 Resilience 12
6.4.4 Accounting 12
6.4.5 Time-limited calls 12
6.4.6 Prioritisation of calls 13
6.5 Net neutrality 13
6.6 Mobility 13
6.7 Scalability 13
6.8 Network management 13
6.9 Energy efficiency 14

7 Gap analysis 14
7.1 Introduction 14
7.2 Service experienced by flows 14
7.2.1 Delay and throughput 14
7.2.2 Packet size 15
7.3 Addressing 15
7.4 Security and accountability 16
7.4.1 Privacy, trust and traceability 16
7.4.2 Resilience 16

7.4.3 Accounting 16
7.4.4 Time-limited calls 16
7.4.5 Prioritisation of calls 16
7.5 Net neutrality 16
7.6 Mobility 16
7.7 Scalability 17
7.8 Network management 17
7.9 Energy efficiency 17

8 Functional architecture for switching and routing 17
8.1 Model of the switching and routing process 17
8.2 Structure of the network 18
8.3 Layers 19

9 Requirements for data plane 19
9.1 General 19
9.2 Asynchronous service 20

10 Requirements for control plane 21
10.1 Control plane protocol 21
10.2 Message format 21
10.2.1 Encoding 21
10.2.2 Size 22
10.2.3 Extensibility 22
10.3 Relationship with link partner 22
10.4 Timeouts 22
10.5 Acknowledgements 22
10.6 Call set-up 23
10.6.1 Calls 23
10.6.2 Routes 23
10.6.3 Identification 23
10.6.4 Information in set-up messages 23
10.6.5 Synchronous flows 24
10.6.6 Asynchronous flows 24
10.7 Routing 24
10.8 Other messages 25
10.8.1 Disconnecting calls, flows, and routes 25
10.8.2 Rerouting 25
10.8.3 Changing QoS parameters 25
10.8.4 Adding flows 25
10.8.5 User data 25

11 Route finding 26
11.1 General requirements 26
11.2 Propagation of routing information 26
11.3 Message format 26

Annex A (informative) Use cases and other background information 27

A.1 Remote contribution to radio broadcasts 27

Bibliography 29
