

ISO/IEC TR 29181-3:2013-04 (E)

Information technology - Future Network - Problem statement and requirements - Part 3: Switching and routing

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviations	3
5	Background	4
5.1	Main features	4
5.2	Rationale for a new paradigm	4
5.2.1	Appropriateness for today's traffic	4
5.2.2	Addressing and scalability	5
5.2.3	Security	5
5.2.4	Complexity of routing hardware	5
5.3	Migration	6
5.4	Structure of this document	6
6	Requirements	6
6.1	Introduction	6
6.2	Classes of flow	7
6.2.1	Minimising complexity	7
6.2.2	Synchronous flows	7
6.2.3	Asynchronous flows	9
6.3	Addressing	11
6.4	Security and accountability	11
6.4.1	Privacy, trust and traceability	11
6.4.2	Corruption of data units	11
6.4.3	Resilience	12
6.4.4	Accounting	12
6.4.5	Time-limited calls	12
6.4.6	Prioritisation of calls	13
6.5	Net neutrality	13
6.6	Mobility	13
6.7	Scalability	13
6.8	Network management	13
6.9	Energy efficiency	14
7	Gap analysis	14
7.1	Introduction	14
7.2	Service experienced by flows	14
7.2.1	Delay and throughput	14
7.2.2	Packet size	15
7.3	Addressing	15
7.4	Security and accountability	16
7.4.1	Privacy, trust and traceability	16
7.4.2	Resilience	16

7.4.3	Accounting	16
7.4.4	Time-limited calls	16
7.4.5	Prioritisation of calls	16
7.5	Net neutrality	16
7.6	Mobility	16
7.7	Scalability	17
7.8	Network management	17
7.9	Energy efficiency	17
8	Functional architecture for switching and routing	17
8.1	Model of the switching and routing process	17
8.2	Structure of the network	18
8.3	Layers	19
9	Requirements for data plane	19
9.1	General	19
9.2	Asynchronous service	20
10	Requirements for control plane	21
10.1	Control plane protocol	21
10.2	Message format	21
10.2.1	Encoding	21
10.2.2	Size	22
10.2.3	Extensibility	22
10.3	Relationship with link partner	22
10.4	Timeouts	22
10.5	Acknowledgements	22
10.6	Call set-up	23
10.6.1	Calls	23
10.6.2	Routes	23
10.6.3	Identification	23
10.6.4	Information in set-up messages	23
10.6.5	Synchronous flows	24
10.6.6	Asynchronous flows	24
10.7	Routing	24
10.8	Other messages	25
10.8.1	Disconnecting calls, flows, and routes	25
10.8.2	Rerouting	25
10.8.3	Changing QoS parameters	25
10.8.4	Adding flows	25
10.8.5	User data	25
11	Route finding	26
11.1	General requirements	26
11.2	Propagation of routing information	26
11.3	Message format	26
Annex A (informative)	Use cases and other background information	27
A.1	Remote contribution to radio broadcasts	27
Bibliography	29
