

# ISO/IEC 15444-14:2013-07 (E)

## Information technology - JPEG 2000 image coding system - Part 14: XML representation and reference

---

<b>Contents</b>		<b>Page</b>
1	Scope .....	1
2	Normative references .....	1
2.1	Identical Recommendation   International Standards .....	1
2.2	Paired Recommendations   International Standards equivalent in technical content.....	1
2.3	Additional references .....	2
3	Definitions.....	2
4	Abbreviations and symbols .....	3
4.1	Abbreviations .....	3
5	Conventions.....	3
6	General description.....	4
6.1	Structure of the JPXML document.....	4
6.2	Creation of a JPXML document.....	5
6.3	Access with the JPXML document .....	6
7	Document creation rules.....	7
7.1	Common rule.....	7
7.2	Element name rule for box format .....	8
7.3	Element name rule for a tagged image format .....	8
7.4	Element name rule for a marker segment.....	9
7.5	Element type attributes.....	9
8	Accessing image data .....	10
8.1	Rules for location conversion.....	10
8.2	Example of location conversion .....	11
Annex A	– JPXML elements for box file format.....	13
A.1	Introduction.....	13
A.2	Box element definitions .....	13
A.3	Examples of XML schemas .....	33
Annex B	– JPXML elements for codestream marker segments.....	61
B.1	Introduction .....	61
B.2	JPEG 2000 codestream marker element definitions.....	61
B.3	Examples of XML schemas .....	68
Annex C	– Examples and guidelines .....	83
C.1	Software conventions for the box type.....	83
C.2	Example of JPXML document conversion.....	84
