Foreword x

Introduction xi

1 Scope 1

2 Conformance 2
2.1 Optical Disk 2
2.2 Generating system 2
2.3 Receiving system 2
2.4 Compatibility statement 2

3 Normative references 2

4 Terms and definitions 3

5 Conventions and notations 7
5.1 Terminology 7
5.1.1 Meaning of words 7
5.1.2 Levels of grouping 7
5.2 Representation of numbers 7
5.3 Integer calculus 8
5.4 Names 8

6 List of acronyms 9

7 General descriptions of disk 11

8 General requirements 13
8.1 Environments 13
8.1.1 Test environment 13
8.1.2 Operating environment 13
8.1.3 Storage environment 14
8.1.4 Transportation 15
8.2 Safety requirements 15
8.3 Flammability 15

9 Reference drive 16
9.1 General 16
9.2 Environmental conditions 16
9.3 Optical system 16
9.4 Optical beam 17
9.5 HF read channel 17
9.6 Radial PP read channel 18
9.7 Disk Clamping 18
9.8 Rotation of the disk and Measurement Velocity 18
9.9 Normalized servo transfer function 19
9.10 Measurement Velocity and Reference servo for axial tracking 20
9.11 Measurement Velocity and Reference servo for radial tracking 21

10 Dimensional characteristics 23
10.1 General 23
10.2 Disk reference planes and reference axis 23
10.3 Overall dimensions 25
10.4 First transition Area 25
10.5 Protection ring 25
10.6 Clamping Zone 25
10.7 Second transition Area 26
10.8 Information Area 26
10.8.1 General 26
10.8.2 Subdivisions of Information Zone on SL disk 27
10.8.3 Subdivisions of Information Zone on DL disks 27
10.9 Rim Area 28

11 Mechanical characteristics 29
11.1 Mass 29
11.2 Moment of inertia 29
11.3 Dynamic imbalance 29
11.4 Axial runout 29
11.4.1 General 29
11.4.2 Residual axial tracking error 29
11.5 Radial runout 30
11.5.1 General 30
11.5.2 Residual radial tracking error on SL disks 30
11.5.3 Residual radial tracking error on DL disks 30
11.6 Durability of Cover Layer 31
11.6.1 Impact resistance of Cover Layer 31
11.6.2 Scratch resistance of Cover Layer 31
11.6.3 Repulsion of fingerprints by Cover Layer 31

12 Optical characteristics in Information Area 32
12.1 General 32
12.2 Refractive index of Transmission Stacks (TS) 32
12.3 Thickness of Transmission Stack(s) 32
12.3.1 Thickness of Transmission Stack of SL disks 32
12.3.2 Thickness of Transmission Stack of DL disks 32
12.4 Reflectivity 33
12.4.1 Reflectivity of Recording Layer of SL disks 33
12.4.2 Reflectivity of Recording Layer of DL disks 34
12.5 Birefringence 34
12.6 Angular deviation 34

13 Data format 35
13.1 General 35
13.2 Data Frames 37
13.3 Error-Detection Code (EDC) 37
13.4 Scrambled Data Frame 38
13.5 Data Block 39
13.6 LDC Block 39
13.7 LDC Code words 40
13.8 LDC Cluster 41
13.8.1 General 41
13.8.2 First interleave step 41
13.8.3 Second interleaving step 41
13.9 Addressing and Control Data 43
13.9.1 General 43
13.9.2 Address Units 43
13.9.3 User-Control Data 46
13.9.4 Byte/Bit assignments for User-Control Data 47
13.10 Access Block 47
13.11 BIS Block 49

13.12 BIS Code words 49
13.13 BIS Cluster 50
13.14 ECC Cluster 54
13.15 Recording Frames 55
13.16 Physical Cluster 55
13.17 17PP Modulation for Recordable data 55
13.17.1 General 55
13.17.2 Bit conversion rules 56
13.17.3 dc-control procedure 56
13.17.4 Frame Sync 56
13.18 Modulation and NRZI conversion 58

14 Physical Data Allocation and Linking 59
14.1 General 59
14.2 Recording-Unit Block (RUB) 59
14.2.1 General 59
14.2.2 Data Run-in 60
14.2.3 Data Run-out 61
14.2.4 Guard_3 field 62
14.3 Locating data relative to wobble addresses 62
14.3.1 General 62
14.3.2 Start-Position Shift (SPS) 62

15 Track format 65
15.1 General 65
15.2 Track shape 65
15.3 Track Path 66
15.4 Track Pitch 67
15.4.1 Track Pitch in BCA Zone 67
15.4.2 Track Pitch in Embossed HFM Areas 67
15.4.3 Track Pitch in Rewritable Areas 67
15.4.4 Track Pitch between Embossed HFM Area and Rewritable Area 67
15.5 Track layout of HFM Groove 67
15.5.1 General 67
15.5.2 Data Format 68
15.5.3 Addressing and Control Data 69
15.5.4 Recording Frames 72
15.6 Track layout of Wobbled Groove(s) 74
15.6.1 General 74
15.6.2 Modulation of wobbles 75
15.7 ADIP Information 76
15.7.1 General 76
15.7.2 ADIP-Unit Types 76
15.7.3 ADIP Word structure 78
15.7.4 ADIP Data structure 79
15.7.5 ADIP Error Correction 81
15.8 Disk Information in ADIP Aux Frame 83
15.8.1 General 83
15.8.2 Error protection for Disk-Information Aux Frames 83
15.8.3 Disk-Information Data structure 84

16 General description of Information Zone 115
16.1 General 115
16.2 Format of Information Zone on Single-Layer disk 115
16.3 Format of Information Zone on Dual-Layer disk 115

17 Layout of Rewritable Area of Information Zone 115

18 Inner Zone 119
18.1 General 119
18.2 Permanent Information & Control data (PIC) Zone 121
18.2.1 General 121

18.2.2 Content of PIC Zone 121
18.2.3 Emergency Brake 122
18.3 Rewritable Area of Inner Zone(s) 124
18.3.1 Protection-Zone 2 124
18.3.2 INFO 2 / Reserved 8 124
18.3.3 INFO 2 / Reserved 7 124
18.3.4 INFO 2 / Reserved 6 125
18.3.5 INFO 2 / Reserved 5 125
18.3.6 INFO 2 / PAC 2 125
18.3.7 INFO 2 / DMA 2 125
18.3.8 INFO 2 / Control Data 2 125
18.3.9 INFO 2 / Buffer 2 125
18.3.10 OPC / Test Zone 125
18.3.11 Reserved 125
18.3.12 INFO1 / Buffer 1 125
18.3.13 INFO 1 / Drive Area (optional) 126
18.3.14 INFO 1 / Reserved 3 127
18.3.15 INFO 1 / Reserved 2 127
18.3.16 INFO 1 / Reserved 1 127
18.3.17 INFO 1 / DMA 1 127
18.3.18 INFO1 / Controle Data 1 127
18.3.19 INFO1 / PAC 1 127

19 Data Zone 127

20 Outer Zone(s) 128
20.1 General 128
20.2 INFO 3 / Buffer 4 129
20.3 INFO 3 / DMA 3 129
20.4 INFO 3 / Control Data 4 129
20.5 Angular buffer 129
20.6 INFO 4 / DMA 4 129
20.7 INFO 4 / Control Data 4 129
20.8 INFO 4 / Buffer 6 129
20.9 Protection-Zone 3 129

21 Physical-Access Control Clusters 130
21.1 General 130
21.2 Layout of PAC Zones 130
21.3 General structure of PAC Clusters 131
21.4 Primary PAC Cluster (mandatory) 134
21.5 Disk Write-Protect PAC Cluster (optional) 137
21.6 IS1 and IS2 PAC Clusters 141

22 Disk Management 142
22.1 General 142
22.2 Disk-Management Structure (DMS) 142
22.2.1 General 142
22.2.2 Disk-Definition Structure (DDS) 143
22.2.3 Defect List (DFL) 147
22.2.4 Defect-List Header 147
22.2.5 List of Defects 148
22.2.6 DFL Entries 150

23 Assignment of Logical-Sector Numbers (LSNs) 151

24 Characteristics of Grooved Areas 152

25 Method of testing for Grooved Area 153
25.1 General 153
25.2 Environment 153
25.3 Reference drive 153

25.3.1 General 153
25.3.2 Read power 153
25.3.3 Read channels 153
25.3.4 Tracking requirements 153
25.3.5 Scanning velocity 153
25.4 Definitions of signals 153

26 Signals from HFM Grooves 155
26.1 Push-Pull signal 155
26.2 HFM Wobble signal 155
26.3 Jitter of HFM signal 155

27 Signals from Wobbled Groove(s) 156
27.1 Phase depth 156
27.2 Push-Pull signal 156
27.3 Wobble signal 156
27.3.1 General 156
27.3.2 Measurement of NWS 156
27.3.3 Measurement of wobble CNR 157
27.3.4 Measurement of harmonic distortion requirements 157

28 Characteristics of Recording Layer 157

29 Method of testing for Recording Layer 158
29.1 General 158
29.2 Environment 158
29.3 Reference drive 158
29.3.1 General 158
29.3.2 Read power 158
29.3.3 Read channels 158
29.3.4 Tracking requirements 158
29.3.5 Scanning velocities 158
29.4 Write conditions 158
29.4.1 Write-pulse waveform 158
29.4.2 Write powers 159
29.4.3 Write conditions for jitter measurement 159
29.4.4 Write conditions for cross-erase measurement 159
29.4.5 Write conditions for inter-velocity overwrite measurements 160
29.5 Definition of signals 160

30 Signals from Recorded Areas 161
30.1 HF signals 161
30.2 Modulated amplitude 161
30.3 Reflectivity-Modulation product 162
30.4 Asymmetry 162
30.5 Jitter 162
30.6 Cross-erase 163
30.7 Inter-velocity overwrite 164
30.8 Read stability 165

31 Local defects 166

32 Characteristics of User Data 166

33 Method of testing for User Data 167
33.1 General 167
33.2 Environment 167
33.3 Reference drive 167
33.3.1 General 167
33.3.2 Read power 167
33.3.3 Read channels 167
33.3.4 Error Correction 167

33.3.5 Tracking requirements 167
33.3.6 Scanning velocities 167
33.4 Definition of signals 168

34 Minimum quality of recorded information 169
34.1 Random Symbol Error Rate 169
34.2 Maximum burst errors 169
34.3 User-written Data 169

35 BCA 170

Annex A (normative) Thickness of Transmission Stacks in case of multiple layers 171

A.1 General 171
A.2 Refractive Index ni of all layers in Cover Layer and Spacer Layer 171
A.3 Thickness variation of the Transmission Stack 171
A.4 Example of thickness calculation for SL 171

Annex B (normative) Measurement of reflectivity 172

B.1 General 172
B.2 Calibration method 172
B.3 Measuring method 173

Annex C (normative) Measurement of scratch resistance of Cover Layer 175

C.1 General 175
C.2 Taber Abrasion test 175

Annex D (normative) Measurement of repulsion of grime by Cover Layer 177

D.1 General 177
D.2 Specifications of stamp 177
D.3 Preparation of ink 178
D.4 Preparation of ink pad 178
D.5 Using ink pad and stamp 179

Annex E (normative) Measurement of wobble amplitude 180

E.1 Measurement methods 180
E.2 Calibration of filters 184

Annex F (normative) Write-pulse waveform for testing 185

F.1 General write-pulse waveform 185
F.2 N-1 write strategy A 186
F.3 N-1 write strategy B 188
F.4 N/2 write strategy 190
F.5 Definition of pulse widths and rise and fall times 194

Annex G (normative) Optimum Power Control (OPC) procedure for media 195

G.1 General 195
G.2 Mathematical model for modulation versus power function 195
G.3 Procedure for determination of OPC parameters for media 197
G.4 Write-power window 197

Annex H (normative) HF signal pre-processing for jitter measurements 198

H.1 General 198
H.2 General implementation of equalizer 198
H.3 Conventional Equalizer circuit 199

H.4 Limit Equalizer circuit 200
H.5 Specifications of supporting circuits 201
H.5.1 Amprifiers and filters 201
H.5.2 Open-loop transfer function for PLL 202
H.5.3 Slicer 203
H.6 Condition for measurement 203
H.7 Jitter measurement 204

Annex I (normative) Measurement procedure 205

I.1 General 205
I.2 Initial adjustments of Reference drive 205
I.3 Jitter measurement 206
I.4 Modulated amplitude measurements 206
I.5 Measurements of Resolution I2pp / I8pp and I3pp / I8pp 206
I.5.1 Method for measuring I2pp and I8pp 206
I.5.2 I3pp / I8pp, I8pp / I8H and asymmetry measurement procedure 208
I.6 Tracking-error signal measurements (PPnorm measurement procedure) 208
I.7 Residual error of axial tracking measurement procedure 209
I.8 Residual error of radial tracking measurement procedure 210
I.9 Random SER measurement 210

Annex J (informative) Measurement of birefringence 211

J.1 Principle of measurement 211
J.2 Measurements conditions 211
J.3 Example of measurement procedure 212
J.4 Interchangeability of measuring results 212

Annex K (informative) Measurement of thickness of Cover Layer and Spacer Layer 213

K.1 Focusing method 213
K.2 Interferometer method 214

Annex L (informative) Measurement of impact resistance of Cover Layer 216

L.1 General 216
L.2 Recommendation for drives 216
L.3 Measurements of impact resistance of Cover Layer 216

Annex M (informative) Groove deviation and wobble amplitude 218

M.1 Relation between normalized wobble signal and wobble amplitude 218
M.2 Tolerance of normalized wobble signal 218

Bibliography 220
