ISO 15397:2014-02 (E)

Graphic technology - Communication of graphic paper properties

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2

4 List of required criteria for communication of paper properties 5

5 ISO standards related to required criteria 6
5.1 Sampling and general information useful for technical communication 6
5.2 Brand name and paper mill 6
5.3 Grammage 7
5.4 Bulk and/or thickness 7
5.5 Roughness for evaluation of surface properties 7
5.6 Gloss 7
5.7 Opacity 8
5.8 Brightness and whiteness of unprinted paper 8
5.9 Colour measurement of paper white point in printing conditions (D50/2°) 9
5.10 Colour measurement of unprinted paper in outdoor conditions (D65/10°) 10
5.11 Supported colour gamut in the context of prepress design 10
5.12 Fluorescence in the context of prepress 10
5.13 Storage conditions, influence of aging and testing conditions for proofing substrates 11
5.14 Bending resistance (bending stiffness) for Sheet-Fed Offset printing substrates 11
