ISO/IEC/IEEE 26531:2015-05 (E)

Systems and software engineering - Content management for product life-cycle, user and service management documentation

Contents

Page

1 Scope 1
2 Conformance 2
3 Normative references 2
4 Terms and definitions 2
5 Abbreviated terms 5
6 Content management process 6
7 Content management project initiation 8
7.1 Developing a business case 8
7.2 Defining requirements for a CCMS 9
7.2.1 Requirements definition 9
7.2.2 Output requirements 9
7.2.3 Storage and retrieval requirements 10
7.2.4 Assembly and linking requirements 10
7.2.5 Authoring and workflow requirements 10
8 Content management project plan 11
8.1 Implementation plan 11
8.2 Information model 11
8.3 Information model specification 12
8.4 Authoring guidelines 13
8.4.1 Training authors 13
8.4.2 Code reviews 13
8.5 Reuse strategy 14
8.5.1 Content inclusion 14
8.5.2 Content variables 14
8.5.3 Content conditional processing 14
8.6 Metadata schema 15
8.6.1 Administrative metadata 16
8.6.2 Descriptive metadata 16
8.6.3 Processing metadata 16
8.7 Workflow specification 17
8.7.1 Workflow approvals 17
8.7.2 Translation workflow 18
8.7.3 Workflow completion 18
8.8 Schedule of activities, deliverables, and responsibilities 18
8.9 Training plan 18
8.10 Stylesheet development 18
8.11 Pilot project specification 19
8.12 Organizational rollout 19
9 Information development 19
9.1 Content conversion 19
9.2 Content authoring 20
9.2.1 Structured authoring 20
9.2.2 Unstructured authoring 20

9.2.3 Content granularity 21

10 Management and control 21
10.1 Managing quality 21
10.2 Review and approval of content 22
10.3 Search and retrieval 23
10.4 Localization and translation 23
10.4.1 Content management for translation 24
10.4.2 Publication of translated content 24
10.4.3 Translation of vector graphics 24
10.5 Content deletion 24
10.6 Content and component archiving 25

11 Publication 25
11.1 Release management 25
11.2 Version management 26
11.3 Publication of content 26

12 Component Content Management System requirements 27
12.1 General 27
12.2 Component Content Management System framework 28
12.2.1 General storage requirements 28
12.2.2 Content types 28
12.2.3 Metadata structures 28
12.2.4 Organizational structures 29
12.3 Component Content Management System management 29
12.3.1 Component creation and modification 30
12.3.2 Import/export 30
12.4 Content object management 31
12.4.1 Check-out/check-in 31
12.4.2 Bulk check-out/check-in 31
12.4.3 Link management 31
12.4.4 Search 32
12.4.5 Advanced search capabilities 34
12.4.6 Versioning 35
12.4.7 Branch and merge 35
12.4.8 Release management 36
12.5 Graphics and multimedia management 36
12.6 Component Content Management System administration 37
12.6.1 Component Content Management System user administration 37
12.6.2 Security and auditing 37
12.6.3 Security provisions 37
12.7 Content authoring 38
12.7.1 General authoring 39
12.7.2 Native authoring 39
12.7.3 Authoring integration 39
12.7.4 Acquisition 40
12.8 Workflow 40
12.8.1 Workflow functionality 40
12.8.2 Enhanced workflow functionality 41
12.8.3 Workflow reporting 41
12.9 Content publication 42
12.9.1 Export to publishing support 42
12.9.2 Centralized publishing support 42
12.9.3 Publishing interface 42
12.9.4 XML publishing pipeline 43
12.10 Localization and translation management 43
12.10.1 Link management support 43
12.10.2 XLIFF support 43
12.11 Component Content Management System interoperability 44
12.11.1 Application Programming Interface 44
12.11.2 Libraries and frameworks 44

12.11.3 Web services 44
12.11.4 Advanced Application Programming Interface methods 44

Annex A (Informative) Business case considerations for content management 46
