

ISO/IEC 11693-3:2015-06 (E)

Identification cards - Optical memory cards - Part 3: Authentication techniques

| Contents | | Page |
|--------------------|---|-------------|
| Foreword | | iv |
| Introduction | | v |
| 1 | Scope | 1 |
| 2 | Normative references | 1 |
| 3 | Terms and Definitions | 1 |
| 4 | Authentication techniques | 2 |
| 5 | Physical characteristics of authentication elements | 2 |
| 5.1 | Dimensions | 2 |
| 5.2 | Technology combinations | 2 |
| 5.3 | Card construction | 3 |
| 5.4 | Cross section at accessible optical area | 3 |
| 5.4.1 | Protective layer(s) | 3 |
| 5.4.2 | Storage layer | 3 |
| 5.4.3 | Reflective layer | 4 |
| 5.4.4 | Substrate layer | 4 |
| 5.4.5 | Adhesive layer | 4 |
| 5.5 | Bending stiffness | 4 |
| 5.6 | Card warpage | 4 |
| 5.7 | X-rays | 4 |
| 5.8 | Toxicity | 4 |
| 5.9 | Ultraviolet light | 4 |
| 5.10 | Light transmittance | 5 |
| 5.11 | Bending properties | 5 |
| 5.12 | Resistance to chemicals | 5 |
| 5.13 | Atmospheric requirements | 5 |
| 5.14 | Durability | 5 |
| 5.15 | Dimensional stability and warpage with temperature and humidity | 5 |
| 5.16 | Default test environment and conditioning | 5 |
| 6 | Optical properties and characteristics | 5 |
| 6.1 | Surface roughness/scattering | 5 |
| 6.2 | Reflectivity of blank accessible optical area | 5 |
| 6.3 | Optical resolution | 6 |
| 6.4 | Polarization | 6 |
| Bibliography | | 7 |
