ISO/IEC TR 29110-3-4:2015-10 (E)

Systems and software engineering - Lifecycle profiles for Very Small Entities (VSEs) - Part 3-4: Autonomy-based improvemen t method

Contents

Page

Foreword iv

Introduction v

1 Scope 1
1.1 Fields of application 1
1.2 Target audience 1

2 Normative references 1

3 Terms and definitions 2

4 Conventions and abbreviated terms 2
4.1 Naming, diagramming, and definition conventions 2
4.2 Abbreviated terms 2

5 Process improvement context for VSEs 2
5.1 Considerations of related standards for VSEs 2
5.2 Rationale of the process improvement for VSEs 2

6 Process improvement approach for VSEs 3

7 Characteristics for autonomy-based approach 4
7.1 General 4
7.2 Autonomy 4
7.3 Conciseness and easiness to understand 4
7.4 Low cost, quick cycle and controllable 4
7.5 Confidence of effectiveness and necessity 4
7.6 Communication with stakeholders and communities 4

8 Framework of process improvement 5
8.1 Initiation of improvement 5
8.2 Activities of improvement 5
8.2.1 Activity 1: Awareness of process problems 5
8.2.2 Activity 2: Analysis of problems and their relationships 5
8.2.3 Activity 3: Analysis of the root cause of problems 5
8.2.4 Activity 4: Identification of a process or processes relating to the root cause 5
8.2.5 Activity 5: Clarification of the fundamental purpose, outcomes, and practices of the process 5
8.2.6 Activity 6: Study on best practices on the process 6
8.2.7 Activity 7: Develop improvements to eliminate or mitigate problems 6
8.2.8 Activity 8: Evaluate the improvement plan for feasibility and impact 6
8.3 Continuous improvement cycle 6
8.4 Improved communication and agreement 6
8.5 Competency for improvement 7
8.6 Enhancement tools for improvement 7
8.7 Preparation or selection of a VSE profile 7

9 Improvement means growth and innovation 7

Annex A (informative) Example: SPINA3CH method for the basic profile 8

Annex B (informative) Adapting various profiles with the SPINA3CH method 20
