

ISO/IEC TR 29110-2-2:2016-05 (E)

Systems and software engineering - Lifecycle profiles for Very Small Entities (VSEs) - Part 2-2: Guide for the development of domain-specific profiles

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviations	1
5	Overview of a domain-specific VSE profile	1
5.1	Preparation of a domain-specific VSE profile	1
5.2	Implementation of a domain-specific VSE profile	2
5.3	VSE profile in a supply chain and operational environments	3
6	Background factors to identify a new domain-specific profile	4
6.1	User view for process purposes	4
6.2	Contract and distribution of processes	4
6.3	Contract and distribution of responsibilities	5
6.4	Competency of suppliers	6
6.5	Interface problem and integrating process	7
6.6	Application domain and business convention	8
6.7	Other situational factors affecting development of a VSE profile for a specific domain	8
7	Identifying VSE processes	8
7.1	Selection approach	8
7.2	Factors that should be considered in the profile development procedure	9
7.2.1	System integrity level	9
7.2.2	Project size, complexity, novelty, product lifetime, and/or reuse conventions	9
7.2.3	Adding processes and/or practices	9
7.2.4	VSE competency	9
7.2.5	Contractual situation	9
7.2.6	Effective use of external resources and support tools	10
7.2.7	Other factors	10
7.2.8	Impacts of factor consideration and rationales	10
7.2.9	Expression of rationales	11
7.3	Examples for a profile preparation consideration	11
8	Developing the profile description	11
9	Self-defined profile and self-declaration of conformance	12
Annex A (informative)	Example for a profile preparation consideration	13
Annex B (informative)	Classification of situational factors on software development	17
Annex C (informative)	Tools and services	18
Annex D (informative)	Example of a VSE profile definition	20
Bibliography		25
