

ISO/IEC/IEEE 8802-1BR:2016-10 (E)

Information technology - Telecommunications and information exchange between systems - Local and metropolitan area networks - Specific requirements - Part 1BR: Virtual bridged local area networks - Bridge port extension

Contents	Page
1. Overview.....	1
1.1 Scope.....	1
1.2 Purpose.....	2
2. Normative references	3
3. Definitions	4
4. Acronyms and abbreviations	6
5. Conformance.....	7
5.1 Terminology.....	7
5.2 Protocol Implementation Conformance Statement (PICS).....	7
5.3 Bridge Port Extender Conformance.....	7
5.4 Controlling Bridge Conformance	8
6. Principles of Bridge Port Extension.....	10
6.1 Bridge Port Extension Overview	10
6.2 Extended Bridge	11
6.3 Base and aggregating Bridge Port Extenders	13
6.4 Bridge Port Extender operation	14
6.5 Bridge Port Extender architecture.....	16
6.6 Bridge Port Extender Model of operation.....	17
6.7 Bridge Port Extender Frame Reception	19
6.8 Bridge Port Extender Transmit and Receive	19
6.9 Bridge Port Extender tag handler.....	20
6.10 Bridge Port Extender Internal Sublayer Service.....	21
6.11 Bridge Port Extender Forwarding Process.....	25
6.12 Bridge Port Extender Filtering Database	29
6.13 Determination of the Upstream Port.....	29
6.14 Upstream Port Addressing	30
6.15 Bridge Port Extender Initialization	30
6.16 Support of Congestion Points	31
7. Tagged frame format	32
7.1 Representation and encoding of tag fields	32
7.2 Tag format.....	32
7.3 Tag Protocol Identifier (TPID) formats	32
7.4 Tag Protocol Identification	32
7.5 E-TAG Control Information	32
8. Support of Bridge Port Extension by C-VLAN components	35
8.1 Use of Tags	36
8.2 Bridge Port Extension Port Types	36
8.3 Internal Bridge Port Extender Cascade Ports	37
8.4 Bridge Port Extender Upstream Ports.....	39

8.5	External Extended Ports.....	39
8.6	External Bridge Port Extender Cascade Ports	40
8.7	Traffic isolation.....	41
8.8	Support of Port Extension by a C-VLAN component MAC Relay.....	41
8.9	Remote replication	42
8.10	Support of Remote Replication by a Controlling Bridge	43
8.11	Assignment of E-CIDs.....	44
8.12	Support of Congestion Notification.....	45
9.	Port Extender Control and Status Protocol	46
9.1	Port Selection and Addressing	46
9.2	PE CSP State Machines	46
9.3	Protocol Errors	52
9.4	PE CSP PDUs	52
9.5	Basic TLV format	52
9.6	Command TLV	54
9.7	Flow Control	56
9.8	Messages	56
9.9	Additional TLVs	61
10.	Bridge management	72
10.1	Data types	72
10.2	Bridge Port Extension Entries.....	72
11.	Management Information Base (MIB)	75
11.1	Structure of the IEEE8021-PE MIB	75
11.2	Relationship to other MIBs.....	76
11.3	Security considerations	76
11.4	Definition of the IEEE8021-PE MIB Module'	78
	Annex A (normative) PICS proforma	89
	Annex B (normative) IEEE 802.1 Organizationally Specific TLVs	105
	Annex C (informative) Utilizing VDP with Port Extension	114
	Annex D (informative) Extended Bridge Initialization	116
	Annex E (informative) Bibliography	121
