

ISO/IEC TR 20913:2016-11 (E)

Information technology - Data centres - Guidelines on holistic investigation methodology for data centre key performance indicators

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms, definitions and abbreviated terms	1
3.1 Terms and definitions	1
3.2 Abbreviated terms	2
4 Background and motivation	2
4.1 General concept of holistic investigation method	2
4.2 Usefulness of spider web chart methods for visualizing data centre KPIs	3
4.3 Usefulness of aggregating data centre KPIs	4
5 Spiderwebchart-based KPIs status observation method	4
5.1 Principles for constructing a spider web chart using KPIs	5
5.1.1 Selection of axis on a spider web chart	5
5.1.2 Presentation of KPIs on axes	5
5.2 Example of a holistic approach	5
5.3 Example of holistic approach of data centre by use of a spider web chart	6
6 Control chart method extending a basic spider web chart to observe the operational status	11
6.1 Motivation for control chart method for energy efficiency monitoring	11
6.2 Control chart approach for energy efficiency monitoring	11
7 Considerations for applying holistic investigation methods	14
8 SWOT analysis results for holistic investigation methods	14
Bibliography	16
