

ISO/IEC 15961-3:2019 (E)

Information technology — Data protocol for radio frequency identification (RFID) for item management — Part 3: RFID data constructs

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms, definitions and abbreviated terms
3.1	Terms and definitions
3.2	Abbreviated terms
4	Conformance
4.1	Conformance of encoders
4.2	Conformance of decoders
5	Application Family Identifier (AFI)
5.1	General
5.2	AFI values
5.3	AFI assignment
5.4	Monomorphic-Ulls and AFI
5.5	Self-assignment of AFIs
5.6	AFI extension mechanism
6	Data format
6.1	General
6.2	Data format values
6.3	Data format assignment by the Registration Authority
6.4	Self-assignment of data formats 29 and 30
6.4.1	Data format 29
6.4.2	Data format 30
6.5	Data format extension mechanism
7	Object Identifiers
7.1	General
7.2	General use of Object Identifiers in open application environments
7.3	Use of Object Identifiers in closed application environments
7.4	Object Identifier for the Unique Item Identifier
7.5	Object Identifiers for other item attendant data
Annex A	(informative) First, second and third arcs of Object Identifier tree
