## Information technology - Measurement and rating of performance of computer-based software systems

---

<b>Contents</b>		<b>Page</b>
Foreword v		
Introduction VI		
Section 1: General .....		1
1	Scope .....	1
2	Conformance .....	3
3	Normative reference .....	3
4	Definitions .....	4
5	Abbreviations and symbols .....	7
5.1	Abbreviations .....	7
5.2	Symbols .....	8
Section 2: Principles of measurement and rating .....		10
6	The measurement .....	10
6.1	Configuration requirements .....	10
6.2	User emulation .....	10
6.2.1	Random user behaviour .....	10
6.2.2	Remote terminal emulator .....	10
6.2.3	Workload parameter set .....	11
6.2.4	Parameter set for proving the accuracy of the user emulation .....	11
6.3	The measurement procedure .....	12
6.3.1	The time phases of the measurement procedure .....	12
6.3.2	Writing a measurement logfile .....	13
6.3.3	Writing a computation result file .....	13
6.4	Proof of validity of the measurement .....	13
6.4.1	Proof of the CBSS's computational correctness .....	13
6.4.2	Proof of the remote terminal emulator's accuracy .....	13
6.4.3	Proof of the measurement result's statistical significance .....	13
7	Calculation of the performance values of the SUT .....	14
7.1	Mean execution time .....	14
7.2	Throughput .....	14
7.3	Timely throughput .....	14
8	Basic data for rating .....	14
8.1	User requirements .....	14
8.2	The reference environment for rating software efficiency .....	14
8.2.1	Reference environment for assessing application software efficiency .....	15
8.2.2	Reference environment for assessing system software efficiency .....	15
9	Rating the Performance values .....	15
9.1	Computing the performance reference values .....	15
9.1.1	Mean execution time reference values .....	15
9.1.2	Throughput reference values .....	15
9.2	Computing the performance rating values .....	15

9.2.1	The mean execution time rating values .....	15
9.2.2	Throughput rating values .....	15
9.2.3	The timeliness rating values.....	16
9.3	Rating the overall performance of the SUT.....	16
9.4	Assessment of performance .....	17
9.4.1	The steps of assessment process .....	17
9.4.2	Weak reference environment.....	17
<b>Section 3: Detailed procedure for measurement and rating .....</b>		<b>18</b>
10	Input requirements .....	18
10.1	The SUT description.....	18
10.1.1	Specification of the hardware architecture and configuration .....	18
10.1.2	Specification of the system software configuration .....	18
10.1.3	The application programs.....	19
10.1.4	Additional software required for the measurement run .....	19
10.1.5	The stored data .....	19
10.1.6	Additional information for proof .....	19
10.2	The workload parameter set.....	19
10.2.1	The activity types.....	19
10.2.2	Activity input variation .....	20
10.2.3	The task types with timeliness function and task mode .....	20
10.2.4	The chain types and their frequencies .....	21
10.2.5	Preparation times' mean values and their standard deviations .....	21
10.3	Input for measurement validation.....	22
10.3.1	Correct computation results.....	22
10.3.2	Variation of input data and its resulting output.....	22
10.3.3	Criteria for precision of working of the RTE .....	22
10.3.4	Criteria for statistical validity of results .....	22
11	The measurement .....	22
11.1	The measurement procedure .....	22
11.2	Individual rating interval .....	23
12	Output from measurement procedure.....	25
12.1	Measurement logfile .....	25
12.2	Computation result file.....	25
13	Validation of measurements.....	26
13.1	Validation of the computational correctness of the SUT .....	26
13.2	Validation of the accuracy of the RTE .....	26
13.2.1	Validity test by checking the relative chain frequencies.....	26
13.2.2	Validity test by checking the preparation times .....	26
13.3	Validation of the statistical significance of the measured mean execution time .....	27
14	Calculation of the performance values of the SUT .....	28
14.1	Mean execution time .....	28
14.2	Throughput.....	28
14.3	Timely throughput .....	28
15	Rating the measured Performance values of the SUT.....	29
15.1	Specification of rating level.....	29
15.2	Computing performance reference values .....	29
15.2.1	Mean execution time reference values.....	29
15.2.2	Throughput reference values .....	29
15.3	Computing rating values.....	29
15.3.1	Computing mean execution time rating values.....	29
15.3.2	Computing throughput rating values .....	30
15.3.3	Computing timeliness rating values.....	30
15.4	Rating.....	30
15.4.1	Mean execution time rating .....	30
15.4.2	Throughput rating.....	31

<b>15.4.3</b>	<b>Timeliness rating .....</b>	<b>31</b>
<b>15.4.4</b>	<b>Overall rating .....</b>	<b>31</b>
<b>Annex A (normative) Specification of the RTE's basic functions .....</b>		<b>32</b>
<b>Annex B (normative) Additional calculation formulas .....</b>		<b>33</b>
<b>Annex C (normative) Format of the workload description .....</b>		<b>41</b>
<b>Annex D (normative) Format of the logfile.....</b>		<b>45</b>
<b>Annex E (informative) Utility programs.....</b>		<b>46</b>
<b>Annex F (informative) Examples of workloads .....</b>		<b>48</b>
