## Information technology - Measurement and rating of performance of computer-based software systems

---

<b>Contents</b>		<b>Page</b>
Foreword		v
Introduction		VI
Section 1: General		1
1	Scope	1
2	Conformance	3
3	Normative reference	3
4	Definitions	4
5	Abbreviations and symbols	7
5.1	Abbreviations	7
5.2	Symbols	8
Section 2: Principles of measurement and rating		10
6	The measurement	10
6.1	Configuration requirements	10
6.2	User emulation	10
6.2.1	Random user behaviour	10
6.2.2	Remote terminal emulator	10
6.2.3	Workload parameter set	11
6.2.4	Parameter set for proving the accuracy of the user emulation	11
6.3	The measurement procedure	12
6.3.1	The time phases of the measurement procedure	12
6.3.2	Writing a measurement logfile	13
6.3.3	Writing a computation result file	13
6.4	Proof of validity of the measurement	13
6.4.1	Proof of the CBSS's computational correctness	13
6.4.2	Proof of the remote terminal emulator's accuracy	13
6.4.3	Proof of the measurement result's statistical significance	13
7	Calculation of the performance values of the SUT	14
7.1	Mean execution time	14
7.2	Throughput	14
7.3	Timely throughput	14
8	Basic data for rating	14
8.1	User requirements	14
8.2	The reference environment for rating software efficiency	14
8.2.1	Reference environment for assessing application software efficiency	15
8.2.2	Reference environment for assessing system software efficiency	15
9	Rating the Performance values	15
9.1	Computing the performance reference values	15
9.1.1	Mean execution time reference values	15
9.1.2	Throughput reference values	15
9.2	Computing the performance rating values	15

9.2.1	The mean execution time rating values .....	15
9.2.2	Throughput rating values .....	15
9.2.3	The timeliness rating values.....	16
9.3	Rating the overall performance of the SUT.....	16
9.4	Assessment of performance .....	17
9.4.1	The steps of assessment process .....	17
9.4.2	Weak reference environment.....	17
<b>Section 3: Detailed procedure for measurement and rating .....</b>		<b>18</b>
10	Input requirements .....	18
10.1	The SUT description.....	18
10.1.1	Specification of the hardware architecture and configuration .....	18
10.1.2	Specification of the system software configuration .....	18
10.1.3	The application programs.....	19
10.1.4	Additional software required for the measurement run .....	19
10.1.5	The stored data .....	19
10.1.6	Additional information for proof .....	19
10.2	The workload parameter set.....	19
10.2.1	The activity types.....	19
10.2.2	Activity input variation .....	20
10.2.3	The task types with timeliness function and task mode .....	20
10.2.4	The chain types and their frequencies .....	21
10.2.5	Preparation times' mean values and their standard deviations .....	21
10.3	Input for measurement validation.....	22
10.3.1	Correct computation results.....	22
10.3.2	Variation of input data and its resulting output.....	22
10.3.3	Criteria for precision of working of the RTE .....	22
10.3.4	Criteria for statistical validity of results .....	22
11	The measurement .....	22
11.1	The measurement procedure .....	22
11.2	Individual rating interval .....	23
12	Output from measurement procedure.....	25
12.1	Measurement logfile .....	25
12.2	Computation result file.....	25
13	Validation of measurements.....	26
13.1	Validation of the computational correctness of the SUT .....	26
13.2	Validation of the accuracy of the RTE .....	26
13.2.1	Validity test by checking the relative chain frequencies.....	26
13.2.2	Validity test by checking the preparation times .....	26
13.3	Validation of the statistical significance of the measured mean execution time .....	27
14	Calculation of the performance values of the SUT .....	28
14.1	Mean execution time .....	28
14.2	Throughput.....	28
14.3	Timely throughput .....	28
15	Rating the measured Performance values of the SUT.....	29
15.1	Specification of rating level .....	29
15.2	Computing performance reference values .....	29
15.2.1	Mean execution time reference values.....	29
15.2.2	Throughput reference values .....	29
15.3	Computing rating values.....	29
15.3.1	Computing mean execution time rating values.....	29
15.3.2	Computing throughput rating values .....	30
15.3.3	Computing timeliness rating values.....	30
15.4	Rating.....	30
15.4.1	Mean execution time rating .....	30
15.4.2	Throughput rating.....	31

<b>15.4.3</b>	<b>Timeliness rating .....</b>	<b>31</b>
<b>15.4.4</b>	<b>Overall rating .....</b>	<b>31</b>
<b>Annex A (normative) Specification of the RTE's basic functions .....</b>		<b>32</b>
<b>Annex B (normative) Additional calculation formulas .....</b>		<b>33</b>
<b>Annex C (normative) Format of the workload description .....</b>		<b>41</b>
<b>Annex D (normative) Format of the logfile.....</b>		<b>45</b>
<b>Annex E (informative) Utility programs.....</b>		<b>46</b>
<b>Annex F (informative) Examples of workloads .....</b>		<b>48</b>
