ISO/IEC/IEEE 8802-1CM:2019-07 (E)

Telecommunications and information exchange between information tech nology systems - Requirements for local and metropolitan area networks - Part 1CM: Time-sensitive networking for fronthaul

Contents

Page

1. Overview 10

1.1 Scope 10
1.2 Purpose 10
1.3 Introduction 10

2. Normative references 12

3. Definitions 13

4. Acronyms and abbreviations 14

5. Conformance 16

5.1 Requirements terminology 16
5.2 Profile Conformance Statement (PCS) 16
5.3 Bridge requirements 16
5.4 Bridge options 17
5.5 End station requirements 18
5.6 End station options 18

6. Fronthaul 20

6.1 Evolved Universal Terrestrial Radio Access background 21
6.2 Class 1 requirements 21
6.3 Class 2 requirements 23
6.4 Synchronization requirements 26

7. Bridge and synchronization functions 31

7.1 Latency components 31
7.2 Bridge delay calculation 31
7.3 Frame preemption 33
7.4 Network synchronization 33
7.5 Flow control 37
7.6 Energy Efficient Ethernet 37

8. Fronthaul profiles 39

8.1 Profile A 40
8.2 Profile B 42

9. Synchronization solutions 44

9.1 Solution for Category A+ 44
9.2 Solutions for Category A 44
9.3 Solutions for Category B 44
9.4 Solutions for Category C 44

Annex A (normative) PCS proforma—Time-Sensitive Networking for Fronthaul Profiles 45

Annex B (informative) Delay calculation examples 55

Annex C (informative) Bibliography 59
