

# ISO/IEC/IEEE 8802-1CM:2019-07 (E)

## Telecommunications and information exchange between information technology systems - Requirements for local and metropolitan area networks - Part 1CM: Time-sensitive networking for fronthaul

---

Contents	Page
1. Overview .....	10
1.1 Scope.....	10
1.2 Purpose.....	10
1.3 Introduction.....	10
2. Normative references .....	12
3. Definitions .....	13
4. Acronyms and abbreviations .....	14
5. Conformance .....	16
5.1 Requirements terminology.....	16
5.2 Profile Conformance Statement (PCS).....	16
5.3 Bridge requirements.....	16
5.4 Bridge options.....	17
5.5 End station requirements .....	18
5.6 End station options.....	18
6. Fronthaul .....	20
6.1 Evolved Universal Terrestrial Radio Access background.....	21
6.2 Class 1 requirements.....	21
6.3 Class 2 requirements.....	23
6.4 Synchronization requirements .....	26
7. Bridge and synchronization functions .....	31
7.1 Latency components .....	31
7.2 Bridge delay calculation .....	31
7.3 Frame preemption.....	33
7.4 Network synchronization.....	33
7.5 Flow control.....	37
7.6 Energy Efficient Ethernet .....	37
8. Fronthaul profiles .....	39
8.1 Profile A.....	40
8.2 Profile B.....	42
9. Synchronization solutions .....	44
9.1 Solution for Category A+ .....	44
9.2 Solutions for Category A .....	44
9.3 Solutions for Category B .....	44
9.4 Solutions for Category C .....	44
Annex A (normative) PCS proforma—Time-Sensitive Networking for Fronthaul Profiles.....	45
Annex B (informative) Delay calculation examples.....	55
Annex C (informative) Bibliography.....	59
