

ISO/IEC TS 23167:2020-02 (E)

Information technology - Cloud computing - Common technologies and techniques

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Symbols and abbreviated terms	4
5	Overview of common technologies and techniques used in cloud computing	4
5.1	General	4
5.2	Technologies	5
5.2.1	General	5
5.2.2	Infrastructure capabilities type of cloud services	5
5.2.3	Platform capabilities cloud services	6
5.2.4	Application capabilities type cloud services	6
5.3	Techniques	6
6	Virtual machines and hypervisors	6
6.1	General	6
6.2	Virtual machines and system virtualization	7
6.3	Hypervisors	7
6.3.1	General	7
6.3.2	Type I hypervisors	8
6.3.3	Type II hypervisors	8
6.4	Security of VMs and hypervisors	9
6.5	VM images, metadata and formats	10
7	Containers and container management systems (CMSs)	11
7.1	General	11
7.2	Containers and operating system virtualization	11
7.2.1	Description of containers	11
7.2.2	Container daemon	12
7.2.3	Container resources, isolation and control	13
7.3	Container images and filesystem layering	14
7.3.1	Image purpose and content	14
7.3.2	Filesystem layering	15
7.3.3	Container image repositories and registries	16
7.4	Container management systems (CMSs)	17
7.4.1	General	17
7.4.2	Common CMS capabilities	17
8	Serverless computing	19
8.1	General	19
8.2	Functions as a service	20
8.2.1	Overview	20
8.2.2	Functions within FaaS	20
8.2.3	Serverless frameworks	21
8.2.4	FaaS relationship to microservices and containers	21

8.3	Serverless databases	22
9	Microservices architecture	22
9.1	General	22
9.2	Advantages and challenges of microservices	23
9.3	Specification of microservices	25
9.4	Multi-layered architecture	25
9.5	Service mesh	28
9.6	Circuit breaker	30
9.7	API gateway	30
10	Automation	30
10.1	General	30
10.2	Automation of the development lifecycle	31
10.3	Tooling for automation	31
11	Architecture of PaaS systems	32
11.1	General	32
11.2	Characteristics of PaaS systems	33
11.3	Architecture of components running under PaaS system	35
12	Data storage as a service	36
12.1	General	36
12.2	Common features of DSaaS	37
12.3	Capabilities type of DSaaS	40
12.4	Significant additional capabilities of DSaaS	40
13	Networking in cloud computing	41
13.1	Key aspects of networking	41
13.2	Cloud access networking	41
13.3	Intra-cloud networking	42
13.4	Virtual private networks (VPNs) and cloud computing	43
14	Cloud computing scalability	44
14.1	Scalability approaches	44
14.2	Parallel instances and load balancing	45
14.3	Elasticity and automation	46
14.4	Database scaling	46
15	Security and the cloud common technologies	47
15.1	General	47
15.2	Firewalls	47
15.3	Endpoint protection	47
15.4	Identity and access management	47
15.5	Data encryption	48
15.6	Key management	48
	Annex A (informative) VM Images and disk images	49
	Bibliography	50
