## Business requirements for end-to-end visibility of logistics flow

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Abbreviated terms .....	2
5	Business requirements overview .....	2
6	Logistics information service system network architecture requirements .....	4
6.1	Network architecture requirements overview .....	4
6.2	LISS network entities .....	5
6.2.1	Logistics information service system (LISS) .....	5
6.2.2	Single window .....	6
6.2.3	Data providers .....	6
6.2.4	Data users .....	6
6.3	Network architecture requirement between different LISSs .....	6
6.4	Network architecture requirement between LISS and SW/SSP .....	6
6.5	Network architecture requirement between LISS and data providers .....	6
6.6	Network architecture requirement between LISS and data users from other LISSs .....	6
7	Visibility data interchange requirements between LISSs .....	7
7.1	Event data classification .....	7
7.2	Data control for different entities in the LISS network .....	8
8	Visibility data interface and process requirements for LISS network .....	8
8.1	Unified user management and authentication process requirements .....	8
8.1.1	Federation authentication among LISSs .....	8
8.1.2	Enable users log in to multiple LISSs and query services by single sign-on .....	8
8.2	Open data access .....	8
9	Guideline for business participants and stakeholders .....	8
9.1	LISS operator .....	8
9.2	Single window operator .....	9
9.3	Data providers .....	9
9.4	Data users .....	9
Annex A (informative) Use cases and gap analysis .....		10
Annex B (informative) Related standards and organizations .....		17
Bibliography .....		23
