

ISO/IEC TR 30164:2020-04 (E)

Internet of things (IoT) - Edge computing

Contents	Page
FOREWORD.....	4
1 Scope.....	5
2 Normative references	5
3 Terms and definitions	5
4 Abbreviated terms	6
5 Overview	8
5.1 General.....	8
5.2 Common concepts	8
5.3 General concepts of edge computing	9
5.4 Example characteristics of edge computing.....	12
5.5 Stakeholders.....	12
6 Viewpoints.....	14
6.1 Conceptual viewpoint.....	14
6.2 Technology viewpoint.....	15
6.2.1 General	15
6.2.2 Cloud computing.....	15
6.2.3 Centralized data centres	16
6.2.4 Micro data centre.....	18
6.2.5 Real-time in edge computing	18
6.2.6 Heterogeneous computing	19
6.2.7 Software defined network (SDN).....	20
6.2.8 Lightweight operating systems.....	20
6.3 Functional viewpoint	20
6.3.1 General	20
6.3.2 Data interoperability	21
6.3.3 Networking	22
6.3.4 Security and privacy	22
6.4 Deployment viewpoint.....	26
6.4.1 General	26
6.4.2 Edge computing three-tier deployment model	26
6.4.3 Edge computing four-tier deployment model	27
7 Use cases	28
7.1 General.....	28
7.2 Smart elevator	29
7.2.1 Description of the use case	29
7.2.2 Diagram of the use case	29
7.2.3 Technical details.....	30
7.3 Smart video monitoring	30
7.3.1 Description of the use case	30
7.3.2 Diagram of the use case	31
7.3.3 Technical details.....	31

7.4	Intelligent transportation systems.....	32
7.4.1	Description of the use case	32
7.4.2	Diagram of the use case	33
7.4.3	Technical details.....	34
7.5	Process control in the smart factory	34
7.5.1	Description of the use case	34
7.5.2	Diagram of the use case	35
7.5.3	Technical details.....	36
7.6	Centralized monitoring of power plants (CMPP)	36
7.6.1	Description of the use case	36
7.6.2	Diagram of the use case	37
7.6.3	Technical details.....	38
7.7	Automated crop monitoring and management system.....	38
7.7.1	Description of the use case	38
7.7.2	Diagram of the use case	40
7.7.3	Technical details.....	40
7.8	Smart lighting system.....	41
7.8.1	Description of the use case	41
7.8.2	Diagram of the use case	42
7.8.3	Technical details.....	43
	Bibliography.....	45
	Figure 1 – IoT edge computing conceptual model	14
	Figure 2 – Container virtualization on a host system	17
	Figure 3 – Lightweight OS architecture	20
	Figure 4 – Software defined network architecture.....	22
	Figure 5 – Edge computing three-tier deployment model.....	27
	Figure 6 – Edge computing four-tier deployment model.....	28
	Figure 7 – Concept of a smart elevator	30
	Figure 8 – Concept of video monitoring with edge computing.....	31
	Figure 9 – Concept of intelligent transportation systems with edge computing	34
	Figure 10 – Example concept of the smart factory using IIoT	36
	Figure 11 – Concept of centralized monitoring of power plants.....	38
	Figure 12 – Concept of automated crop monitoring and management system	40
	Figure 13 – Logical model: connectivity between various components	42
	Figure 14 – Deployment model: single IoT gateway controlling multiple smart lights	43
	Table 1 – Example networking table.....	10
	Table 2 – Capabilities of some IoT entities.....	11
	Table 3 – Technical details of the elements in the smart elevator use case.....	30
	Table 4 – Technical details of the elements in the video monitoring use case	32
	Table 5 – Technical details for the intelligent transportation use case	34
	Table 6 – Technical details for the smart factory use case	36
	Table 7 – Technical details of the CMPP use case.....	38
	Table 8 – Technical details of automated crop monitoring and management system	40
	Table 9 – Technical details of the smart lighting use case.....	44
