FOREWORD.....	3
INTRODUCTION.....	4
1 Scope.....	5
2 Normative references .....	5
3 Terms and definitions .....	5
4 Network connectivity for transport interoperability.....	6
5 Overview .....	7
5.1 Network connectivity model and interfaces between IoT systems.....	7
5.2 Network connectivity model and interfaces within an IoT system.....	8
5.3 Network connectivity stack model .....	10
6 Requirements for network connectivity between IoT systems.....	12
6.1 Overview.....	12
6.2 Network interfaces between different IoT systems.....	13
6.2.1 Network service interface .....	13
6.2.2 Network protocol translation interface.....	13
6.2.3 Network resource interface .....	13
6.3 Requirements of network connectivity .....	13
6.3.1 General .....	13
6.3.2 Service-related requirement.....	13
6.3.3 Communication-related requirement .....	14
6.3.4 Network resource-related requirement .....	14
6.3.5 QoS requirement .....	14
6.3.6 Bandwidth requirement.....	15
6.3.7 Signalling requirement.....	15
6.3.8 Status monitor requirement.....	15
6.3.9 Security requirement .....	15
6.3.10 Time-dependent requirement.....	15
7 Requirements for network connectivity within an IoT system.....	15
7.1 Overview.....	15
7.2 Network elements for supporting network connectivity .....	16
7.2.1 Network service interface .....	16
7.2.2 Network protocol translation interface.....	17
7.2.3 Network resource interface .....	17
7.3 Gateways for supporting network connectivity.....	17
Bibliography.....	18
Figure 1 – Facets of IoT interoperability.....	6
Figure 2 – Network connectivity model between two IoT systems.....	7
Figure 3 – Network connectivity model within an IoT system.....	9
Figure 4 – Network connectivity stack model between IoT systems.....	10
