ISO/IEC 10373-1:2020 (E)

Cards and security devices for personal identification — Test methods — Part 1: General characteristics

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms, definitions and abbreviated terms

3.1 Terms and definitions
3.2 Abbreviated terms

4 Default items applicable to the test methods

4.1 Test environment
4.2 Pre-conditioning
4.3 Selection of test methods
4.4 Default tolerance
4.5 Total measurement uncertainty

5 Test methods

5.1 Card warpage
5.1.1 General
5.1.2 Apparatus
5.1.3 Procedure
5.1.4 Test report
5.2 Dimensions of cards
5.2.1 General
5.2.2 Thickness of card measurements
5.2.2.1 Apparatus
5.2.2.2 Procedure
5.2.2.3 Test report
5.2.3 Height and width of card measurement
5.2.3.1 Apparatus
5.2.3.2 Procedure
5.2.3.3 Test report
5.3 Peel strength
5.3.1 General
5.3.2 Apparatus
5.3.3 Procedure
5.3.4 Test report
5.4 Peel strength including the edge of the card
5.4.1 General
5.4.2 Apparatus
5.4.3 Procedure
5.4.3.1 General
5.4.3.2 Peel strength at the edge of the card
5.4.3.3 Peel strength in the centre of the card
5.4.4 Test report
5.5 Resistance to chemicals
5.5.1 General
5.5.2 Reagents
5.5.2.1 General
5.5.2.2 Solutions for short-term test

5.5.2.3 Solutions for long-term test
5.5.3 Procedure
5.5.3.1 General
5.5.3.2 Short-term solutions
5.5.3.3 Long-term solutions
5.5.3.3.1 Salt mist
5.5.3.3.2 Salt mist additional cleaning (if required)
5.5.3.3.3 Artificial perspiration
5.5.4 Test report
5.6 Card dimensional stability and warpage with temperature and humidity
5.6.1 General
5.6.2 Procedure
5.6.3 Test report
5.7 Adhesion or blocking
5.7.1 General
5.7.2 Procedure
5.7.3 Test report
5.8 Bending stiffness
5.8.1 General
5.8.2 Procedure
5.8.3 Test report
5.9 Dynamic bending stress
5.9.1 General
5.9.2 Apparatus
5.9.3 Calibration method
5.9.4 Procedure
5.9.5 Test report
5.10 Dynamic torsional stress
5.10.1 General
5.10.2 Apparatus
5.10.3 Procedure
5.10.4 Test report
5.11 Opacity
5.11.1 General
5.11.2 Apparatus
5.11.3 Procedure
5.11.3.1 General
5.11.3.2 Measurement
5.11.3.3 Test report
5.12 X-rays
5.12.1 General
5.12.2 Procedure
5.12.3 Test report
5.13 Embossing relief height of characters
5.13.1 General
5.13.2 Apparatus
5.13.3 Procedure
5.13.4 Test report
5.14 Resistance to heat
5.14.1 General
5.14.2 Apparatus
5.14.3 Procedure
5.14.4 Test report
5.15 Surface distortions, raised areas and depressed areas

6 Test methods for ICCs

6.1 Conventions for electrical measurements on ICCs with contacts
6.2 Apparatus for measurements on ICCs with contacts
6.2.1 Default ICC holder, reference axes and default measurement position
6.2.2 Default ICC holder and reference axes
6.2.3 Flattening plate
6.2.4 Default Measurement Position
6.3 Dimension and location of contacts for ICCs with contacts
6.3.1 General

6.3.2 Apparatus
6.3.3 Procedure
6.3.4 Test report
6.4 Mechanical strength of contacts
6.4.1 General
6.4.2 Apparatus
6.4.3 Procedure
6.4.4 Test report
6.5 ESD — Electrostatic discharge for ICC contact cards
6.5.1 General
6.5.2 Test report
6.6 ESS — Electrostatic stress for PICC and VICC
6.6.1 General
6.6.2 Apparatus
6.6.3 Test procedure
6.6.4 Test report
6.7 Electrical resistance of contacts of ICCs with contacts
6.7.1 General
6.7.2 Apparatus
6.7.3 Procedure
6.7.4 Test report
6.8 Additional test methods regarding electrostatic effects
6.9 Surface profile of contacts of ICCs with contacts
6.9.1 General
6.9.2 Apparatus
6.9.3 Procedure
6.9.4 Test report
6.10 ICC — Mechanical strength: 3 wheel test for ICCs with contacts
6.10.1 General
6.10.2 Apparatus
6.10.3 Procedure
6.10.4 Test report

Annex A (informative) Electrostatic discharge conductivity of cards

A.1 Test method 1
A.1.1 Introduction and summary
A.1.2 Apparatus
A.1.2.1 General
A.1.2.2 Contact grid
A.1.2.3 ESD pulse generator
A.1.2.4 Electrical interconnection
A.1.3 Procedure
A.1.3.1 Measurement
A.1.3.2 Calibration check
A.1.4 Test report
A.2 Test method 2 — Static charge transfer assessment
A.2.1 General
A.2.2 Apparatus
A.2.3 Qualification of the discharge detector
A.2.4 Procedure
A.2.5 Test report

Annex B (informative) ESD sensitivity of cards to CDM

B.1 General
B.2 Purpose
B.3 Apparatus
B.4 Further equipment
B.5 Tester qualification and waveform verification
B.6 Procedure
B.7 Classification
B.8 Failure criteria
B.9 Alternative hand-held discharge probe
