

ISO/IEC 30144:2020-10 (E)

Internet of things (IOT) - Wireless sensor network system supporting electrical power substation

Contents	Page
FOREWORD.....	4
INTRODUCTION.....	5
1 Scope.....	7
2 Normative references	7
3 Terms and definitions	7
4 Symbols and abbreviated terms.....	9
5 Intelligent wireless sensor network system supporting electrical power substation.....	10
5.1 System View	10
5.1.1 System overview	10
5.1.2 Subsystems and their relationships.....	13
5.2 Communications View.....	15
5.2.1 Communications overview	15
5.2.2 Sensor nodes	16
5.2.3 Gateways	17
5.2.4 Communication interfaces in the iWSN system	18
6 Technical requirements for the iWSN system supporting electrical power substations.....	19
6.1 System functional requirements	19
6.1.1 Information acquisition and collection	19
6.1.2 Device management	19
6.1.3 Data analysis.....	19
6.1.4 Data display	19
6.1.5 Warning and response.....	20
6.1.6 Network communication.....	20
6.1.7 System privilege management.....	20
6.1.8 Collaborative information process (CIP) and decision support.....	20
6.2 System performance requirements.....	20
6.2.1 Performance requirements of sensor node.....	20
6.2.2 Performance requirements of gateway.....	23
6.2.3 Performance requirements of control subsystem for sensor network.....	25
Annex A (informative) Sensor network reference architecture from ISO/IEC 29182-3.....	27
A.1 Overview of sensor network interfaces.....	27
A.2 Sensor node physical reference architecture.....	29
A.3 Functional model of the sensor network	30
Annex B (informative) The sensor models in IEC 61850.....	31
Bibliography.....	35
Figure 1 – System overview of the iWSN system supporting electrical power substation.....	11
Figure 2 – Communications overview of the iWSN system supporting electrical power substation.....	16

Figure A.1 – Overview of sensor network interfaces in a sensor node, sensor node to sensor node, and sensor node to the external environment.....	27
Figure A.2 – Sensor networks system architecture – Layer focused	28
Figure A.3 – Sensor node physical reference architecture.....	29
Figure A.4 – Functional model of the sensor network.....	30
Table 1 – Mapping between the entities in the System View and the domains of the IoT RA	12
Table 2 – Interface for functional subsystem of sensor networks.....	18
Table B.1 – Sensor models in IEC 61850.....	31
