

ISO/IEC 9594-6:2020-11 (E)

Information technology - Open systems interconnection - Part 6: The Directory: Selected attribute types

| Contents | | Page |
|-----------------|-----------------------------------------------------------------|-------------|
| 1 | Scope | 1 |
| 2 | Normative references..... | 1 |
| 2.1 | Identical Recommendations International Standards | 1 |
| 2.2 | Other references | 2 |
| 2.3 | ISO/IEC Standards | 3 |
| 3 | Definitions | 3 |
| 4 | Abbreviations | 3 |
| 5 | Conventions..... | 4 |
| 6 | Definition of selected attribute types..... | 5 |
| 6.1 | System attribute types | 5 |
| 6.2 | Labelling attribute types..... | 5 |
| 6.3 | Geographical attribute types..... | 10 |
| 6.4 | Organizational attribute types | 12 |
| 6.5 | Explanatory attribute types..... | 13 |
| 6.6 | Postal addressing attribute types | 15 |
| 6.7 | Telecommunications addressing attribute types..... | 17 |
| 6.8 | Preferences attribute types | 20 |
| 6.9 | OSI application attribute types | 21 |
| 6.10 | Relational attribute types..... | 22 |
| 6.11 | Domain attribute types | 23 |
| 6.12 | Hierarchical attribute types | 23 |
| 6.13 | Attributes for applications using tag-based identification..... | 24 |
| 6.14 | Simple Authentication attributes held by object entries | 28 |
| 6.15 | Password policy attributes..... | 30 |
| 6.16 | Notification attributes..... | 34 |
| 6.17 | LDAP defined attribute types..... | 39 |
| 7 | String preparation | 40 |
| 7.1 | Transcode | 40 |
| 7.2 | Map | 40 |
| 7.3 | Normalize..... | 40 |
| 7.4 | Prohibit..... | 40 |
| 7.5 | Check bidi | 41 |
| 7.6 | Insignificant Character Removal..... | 41 |
| 8 | Definition of matching rules..... | 41 |
| 8.1 | String matching rules | 41 |
| 8.2 | Syntax-based matching rules..... | 44 |
| 8.3 | Time matching rules..... | 47 |
| 8.4 | First component matching rules | 49 |
| 8.5 | Word matching rules | 49 |
| 8.6 | Approximate Matching Rules | 52 |
| 8.7 | Special Matching Rules..... | 52 |
| 8.8 | Zonal Match | 53 |
| 8.9 | Identity matching rules..... | 56 |
| 8.10 | Password policy matching rules..... | 57 |
| 8.11 | LDAP defined matching rules..... | 58 |
| 9 | Definition of syntaxes..... | 59 |

| | | |
|---------|---------------------------------------------------------------------------------------|-----|
| 9.1 | Directory syntaxes..... | 59 |
| 9.2 | IETF syntaxes..... | 60 |
| 10 | Definition of Context Types..... | 66 |
| 10.1 | Language Context..... | 66 |
| 10.2 | Temporal Context..... | 66 |
| 10.3 | Locale Context..... | 70 |
| 10.4 | LDAP Attribute Option Context..... | 70 |
| Annex A | – Selected attribute types in ASN.1..... | 72 |
| Annex B | – Attribute types for password policy in ASN.1..... | 103 |
| Annex C | – Upper bounds..... | 109 |
| Annex D | – Alphabetical index of attributes, matching rules and contexts..... | 110 |
| Annex E | – Examples for zonal match matching rules..... | 113 |
| Annex F | – Mapping Object Identifiers and Uniform Resource Names into Distinguished Names..... | 116 |
| F.1 | Scope of this annex..... | 116 |
| F.2 | Object identifier resolution..... | 116 |
| F.3 | Uniform Resource Name (URN) resolution..... | 117 |
| Annex G | – Object identifier based Directory names..... | 120 |
| G.1 | Scope of this annex..... | 120 |
| G.2 | Transformation of object identifiers into Directory names..... | 120 |
| G.3 | The use of object-identifier-based Directory names..... | 120 |
| Annex H | – Amendments and corrigenda..... | 122 |
