ISO/IEC 30161-1:2020-11 (E)

Internet of things (IoT) – Data exchange platform for IoT services – Part 1: General requirements and architecture

Contents

Page

FOREWORD 4
INTRODUCTION 5
1 Scope 6
2 Normative references 6
3 Terms and definitions 6
4 Abbreviated terms 7
5 Overview of IoT services 7
6 Network configurations for IoT services 7
6.1 Overview of network configurations for IoT 7
6.2 Network models for an IoT DEP 9
7 Data exchange platform in IoT reference architecture 9
7.1 General 9
7.2 Position of an IoT DEP in IoT reference architecture 9
7.2.1 Functions of the IoT DEP 9
7.2.2 Positions of the IoT DEP 10
7.3 Operation of an IoT DEP in an IoT system 10
8 Requirements for an IoT DEP 13
8.1 General 13
8.2 Requirements of functional blocks 13
8.2.1 Definitions of functional blocks 13
8.2.2 Communication access control (CAC) 14
8.2.3 Data control 16
8.2.4 Data translation 16
8.2.5 IoT control 16
8.2.6 IoT management 16
8.2.7 Adaptation 16
8.3 Communication protocols 16
8.4 Service mapping 17
9 Operations of an IoT DEP 17
Annex A (normative) Implementation guideline for an IoT DEP 19
A.1 General 19
A.2 Abstraction of lower layer in IoT DEP 20
A.3 Abstraction of lower layer in IoT DEP 21
Annex B (informative) Typical communication protocols for ICN 22
Annex C (informative) Applied use cases based on an IoT data exchange platform 23
C.1 General 23
C.2 Farm product tracking use case: Actors and information exchange 23
C.3 IoT endpoint monitoring systems 24
C.4 IoT-based energy management system for industrial facilities 24
Bibliography 27
