

ISO/IEC 30163:2021-03 (E)

Internet of Things (IoT) - System requirements of IoT/SN technology-based integrated platform for chattel asset monitoring supporting financial services

Contents	Page
FOREWORD.....	3
INTRODUCTION.....	4
1 Scope.....	5
2 Normative references	5
3 Terms and definitions	5
4 Abbreviated terms	5
5 Motivation.....	5
6 System infrastructure description of the integrated IoT/SN system.....	6
7 System requirements of the IoT/SN technology-based integrated platform.....	8
7.1 General system functional requirements for the integrated platform	8
7.1.1 General	8
7.1.2 Functional requirements for the entities in UD	8
7.1.3 Functional requirements for the entities in OMD	8
7.1.4 Functional requirements for the entities in ASD	9
7.1.5 Functional requirements for the entities in the ACD	10
7.1.6 Functional requirements for the entities in the SCD	10
7.2 General system performance requirements for the integrated platform.....	11
7.2.1 General	11
7.2.2 Performance requirements for the entities in the UD, OMD, ASD, and ACD	12
7.2.3 Performance requirements for the entities in the SCD while in warehouse.....	14
7.2.4 Performance requirements for the entities in the SCD while in transit	15
8 System interface descriptions between the entities	16
Bibliography.....	20
Figure 1 – Involved parties and their relationships in chattel mortgage financial services.....	6
Figure 2 – System infrastructure of the IoT/SN integrated system	7
Table 1 – Performance requirements of weight sensing	14
Table 2 – Performance requirements of position sensing	14
Table 3 – Performance requirements of contour sensing.....	14
Table 4 – Performance requirements of video sensing	15
Table 5 – Performance requirements of unauthorized access or intruder detection	15
Table 6 – Performance requirements of gateway in warehouse	15
Table 7 – Performance requirements of in-transit movement sensing.....	15
Table 8 – Performance requirements of gateway in transit	16
Table 9 – Interface description.....	16
