ISO/IEC 29110-4-2:2021 (E)

Systems and software engineering — Lifecycle profiles for Very Small Entities (VSEs) — Part 4-2: Software engineering: Profile specifications: Organizational management profile group

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms, definitions and abbreviated terms

3.1 Terms and definitions
3.2 Abbreviated terms

4 Conformance

4.1 Conformance situations
4.2 Process conformance

5 Naming, diagramming and definition conventions

6 Minimal conditions for organizational management profile use

7 Organizational management profile specifications

7.1 General
7.2 Organizational management process requirements
7.3 Resource management process requirements
7.4 Process management process requirements
7.5 Project portfolio management process requirements

Annex A (informative) Organizational management profile base document references

A.1 General
A.2 Profile requirements definition and composition references
A.2.1 OM process – Organizational management
A.2.2 RM process – Resource management
A.2.3 PSM process – Process management
A.2.4 PPM process – Project portfolio management

Annex B (informative) Organizational management profile PRM

B.1 General
B.2 Overview
B.3 Organizational management process
B.3.1 Organizational management process purpose
B.3.2 Organizational management process outcomes
B.4 Resource management process
B.4.1 Resource management process purpose
B.4.2 Resource management process outcomes
B.5 Process management process
B.5.1 Process management process purpose
B.5.2 Process management process outcomes
B.6 Project portfolio management process
B.6.1 Project portfolio management process purpose
B.6.2 Project portfolio management process outcomes
B.7 Statement of conformity
B.7.1 General
B.7.2 Requirements for process reference models
B.7.3 Process descriptions
