

ISO/IEC 30165:2021-07 (E)

Internet of Things (IoT) - Real-time IoT framework

Contents	Page
FOREWORD.....	3
INTRODUCTION.....	4
1 Scope.....	5
2 Normative references.....	5
3 Terms, definitions and abbreviated terms.....	5
3.1 Terms and definitions.....	5
3.2 Abbreviated terms.....	5
4 Conceptual model.....	6
4.1 General.....	6
4.2 The six domains.....	6
4.3 Edge sub-system.....	6
4.4 Timing constraints.....	7
5 Viewpoints of RT-IoT system conceptual model.....	7
5.1 Time view.....	7
5.1.1 General.....	7
5.1.2 Clock synchronization.....	8
5.1.3 Timestamp.....	8
5.1.4 Time granularity.....	8
5.1.5 Timeout handling.....	9
5.2 Communication view.....	9
5.2.1 General.....	9
5.2.2 Bandwidth management.....	10
5.2.3 Latency and jitter.....	10
5.2.4 Redundancy.....	10
5.2.5 Priority.....	10
5.3 Control view.....	10
5.3.1 General.....	10
5.3.2 Physical safety.....	11
5.3.3 Reliability.....	11
5.3.4 Accuracy.....	11
5.3.5 Fault tolerance.....	11
5.3.6 Closed loop control.....	11
5.4 Computation view.....	12
5.4.1 General.....	12
5.4.2 Real-time task model.....	12
5.4.3 Real-time operating systems.....	12
5.4.4 Real-time databases.....	13
5.4.5 Task scheduling and resource management.....	13
5.4.6 Distributed computing.....	13

Annex A (informative) State of the technology.....	14
Bibliography.....	15
