

ISO/IEC TR 30117:2021 (E)

Information technology — Standards and applications for the integration of biometrics and integrated circuit cards (ICCs)

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Symbols and abbreviated terms
5	Relationships between biometrics and ICCs
5.1	Architectures for the joint use of biometrics and ICCs
5.2	Considerations to be addressed when designing the application
6	Data formats
6.1	General
6.2	Single modality plain biometric data formats
6.3	Encapsulation of multiple modalities and/or security mechanisms
6.4	ICC-specific definitions on biometric data formats
7	Privacy and security
8	Outside-ICC application development
8.1	General overview
8.2	Local applications
8.3	Client-server implementations
9	Use cases profiles
10	Technology evaluation
11	Implementing solutions merging the use of ICCs and biometrics
11.1	Spanish national ID card (DNIE)
11.1.1	General
11.1.2	Biometric services provided
11.1.3	Biometric modalities and data formats
11.1.4	Security mechanisms and operations
11.1.5	Evaluations and results
11.2	ePassport
11.2.1	General
11.2.2	Biometric services provided
11.2.3	Biometric modality and data formats
11.2.4	Security mechanisms and operations
