ISO/IEC 21823-3:2021-09 (E)

Internet of things (IoT) - Interoperability for IoT systems - Part 3: Semantic interoperability

Contents

Page

FOREWORD 4
INTRODUCTION 5
1 Scope 8
2 Normative references 8
3 Terms and definitions 8
4 Abbreviated terms 9
5 IoT semantic interoperability process 9
5.1 Overview 9
5.2 IoT semantic interoperability process requirements 10
5.3 IoT semantic interoperability models 11
5.4 IoT semantic interoperability guidelines 13
5.4.1 Guidelines on the capture of semantic meaning 13
5.4.2 Guidelines on the integration of semantic interoperability capability 14
5.4.3 Guidelines on the support of semantic interoperability engineering 15
6 IoT semantic interoperability life cycle 19
6.1 Life cycle requirements 19
6.2 Life cycle model 22
6.3 Life cycle implementation guidelines 23
6.3.1 Guidelines on ontology life cycle 23
6.3.2 Guidelines on semantic interoperability life cycle 23
6.3.3 Guidelines on IoT system life cycle 24
Annex A (informative) Guidance on how to learn IoT semantic interoperability 26
Annex B (informative) Guidance on how to develop IoT semantic interoperability 29
B.1 Developing semantic interoperability capabilities 29
B.2 Building steps 29
Annex C (informative) Guidance on how to manage IoT semantic interoperability life cycle 31
C.1 Interoperability specification life cycle that supports ontologies 31
C.2 IoT system life cycle supporting interoperability 32
Annex D (informative) Ontological specification of the IoT Reference Architecture 33
D.1 General 33
D.2 Service, network, IoT device and IoT gateway 33
D.3 IoT-User 34
D.4 Virtual entity, physical entity and IoT device 35
D.5 Domain-based Reference Model (RM) 35
Annex E (informative) Related existing ontologies 37
E.1 W3C Semantic Sensor Network ontology 37
E.2 IoT-Lite 37
E.3 Open Connectivity Foundation (OCF) ontology 37
E.4 ETSI Smart Applications REFerence ontology 41
E.5 oneM2M Base Ontology 42
E.6 Sensor Model Language (SensorML) 42
E.7 IoT-O 43
E.8 IoT ontology unification approach 43
Bibliography 45
