

ISO/IEC 21558-1:2022-03 (E)

Telecommunications and information exchange between systems - Future network architecture - Part 1: Switching and routing

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms	1
5 Network elements and links	2
5.1 Levels of service.....	2
5.2 Links.....	2
5.3 Topology.....	2
6 Service interfaces	2
6.1 Service provided to the layers above.....	2
6.2 Service required from the layers below.....	3
7 Flows	3
7.1 General.....	3
7.2 AV flows.....	3
7.3 Connection-oriented IT flows.....	3
7.4 Connectionless IT flows.....	3
8 IT services	4
8.1 Packet format.....	4
8.2 QoS considerations.....	4
8.3 Carriage over other technologies.....	4
9 AV services	4
9.1 Synchronisation domains.....	4
9.2 Packet format.....	5
9.3 QoS considerations.....	5
9.3.1 Flows within an island.....	5
9.3.2 AV flows not within an island.....	5
9.3.3 All AV flows.....	5
9.4 Slots and allocations.....	5
9.5 Virtual links.....	6
10 Signalling service	6
Bibliography	7
