

ISO/IEC 30169:2022-05 (E)

Internet of Things (IoT) - IoT applications for electronic label system (ELS)

Contents	Page
FOREWORD.....	4
INTRODUCTION.....	5
1 Scope.....	6
2 Normative references	6
3 Terms and definitions	6
4 Abbreviated terms	7
5 Motivation.....	7
5.1 Background.....	7
5.2 Purpose and significance	8
6 System framework and IoT application model	8
6.1 General.....	8
6.2 System framework	8
6.3 IoT application model.....	9
6.3.1 General	9
6.3.2 User	9
6.3.3 ELS backend system	10
6.3.4 Database.....	11
6.3.5 IoT gateway.....	11
6.3.6 ELs.....	12
6.3.7 Perception objects	12
7 General technical requirements	12
7.1 General.....	12
7.2 Function requirements	12
7.2.1 ELS backend system	12
7.2.2 Database.....	14
7.2.3 IoT gateway.....	14
7.2.4 ELs.....	14
7.3 Interface requirements	15
7.3.1 ELS backend system	15
7.3.2 Database.....	15
7.3.3 IoT gateway.....	16
7.3.4 ELs.....	16
7.3.5 System scalability	16
7.4 Performance requirements.....	16
7.4.1 ELS backend system	16
7.4.2 Database.....	16
7.4.3 IoT gateway.....	17
7.4.4 ELs.....	17
Annex A (normative) Reference testing requirements.....	19
A.1 General.....	19
A.2 Mechanical testing of display devices	19
A.3 System performance testing.....	19

Annex B (informative) Application scenarios, and use cases of ELS.....	20
B.1 Application scenarios	20
B.1.1 Consumer-oriented representation of merchandise information.....	20
B.1.2 Staff-oriented representation of merchandise management information	20
B.1.3 P2P delivery and self pick-up oriented merchandise collection.....	21
B.2 Use cases.....	21
B.2.1 Grocery store.....	21
B.2.2 Cosmetics shop	21
B.2.3 Fashion shop.....	21
B.2.4 Industry factory.....	22
Bibliography.....	23
Figure 1 – System framework of the IoT applications for ELS.....	8
Figure 2 – IoT application model of the IoT applications for ELS	9
