ISO/IEC 26563:2022-12 (E)

Software and systems engineering - Methods and tools for product line configuration management

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Abbreviated terms 2

5 Reference model for product line configuration management 3
5.1 Overview 3
5.2 Constituents of reference model for product line configuration management 3

6 Product line CM technical management 7
6.1 General 7
6.2 Product line configuration planning 7
6.2.1 Principal constituents 7
6.2.2 Define PL configuration strategy 8
6.2.3 Assign responsibility for PL configuration operationalization 8
6.2.4 Define success measures for PL configuration operationalization 8
6.2.5 Estimate adequate resources needed for PL configuration operationalization 9
6.2.6 Document PL configuration plans 9
6.3 Product line configuration enabling 10
6.3.1 Principal constituents 10
6.3.2 Enable PL configuration environment 10
6.3.3 Provide guidance for PL configuration operationalization 11
6.3.4 Enable measurement environment for quantifying PL configuration operationalization 11
6.4 Product line configuration managing 11
6.4.1 Principal constituents 11
6.4.2 Review PL configuration operationalization status with success measures 12
6.4.3 Control issues on PL configuration operationalization 12
6.4.4 Make corrective actions on PL configuration operationalization 13

7 Product line configuration management operationalization 13
7.1 General 13
7.2 Product line configuration management initiation 13
7.2.1 Principal constituents 13
7.2.2 Initiate PL configuration operation 14
7.2.3 Perform preliminary PL configuration 14
7.3 Product line configuration item identification 14
7.3.1 Principal constituents 14
7.3.2 Select PL configuration items 15
7.3.3 Identify variations of configuration items in time and space 16
7.3.4 Structure configuration information aligned to the structure of a product line 16
7.3.5 Establish unique identifiers facilitating traceability 17
7.4 Product line configuration baselining 17
7.4.1 Principal constituents 17
7.4.2 Capture PL configuration baselines in time and space 18

7.4.3 Create and release PL configuration baselines in time and space 18
7.4.4 Facilitate commonality and variability management in baselines of time and space 19
7.4.5 Maintain baselines readily available by distributed configuration management 19
7.5 Product line configuration status accounting 20
7.5.1 Principal constituents 20
7.5.2 Evaluate and coordinate change requests for PL configuration items 21
7.5.3 Identify PL configuration delta 21
7.5.4 Update baselines for PL configuration delta 21
7.5.5 Relate PL configuration delta to relevant PL configuration items 22
7.6 Product line configuration reporting 22
7.6.1 Principal constituents 22
7.6.2 Develop and maintain the PL configuration management status information 23
7.6.3 Capture, store, and report PL configuration anomaly 23
7.6.4 Capture, store and report PL configuration management data 23

8 Product line configuration management support 23
8.1 General 23
8.2 Quality assurance for product line CM 24
8.2.1 Principal constituents 24
8.2.2 Objectively evaluate PL configuration activities 25
8.2.3 Objectively evaluate PL configuration work products 25
8.2.4 Communicate and resolve non-compliance issues 25
8.2.5 Establish records of quality assurance activities for PL configuration 26
8.3 Product line configuration change control 26
8.3.1 Principal constituents 26
8.3.2 Identify and record change requests for product line configuration 27
8.3.3 Evaluate and coordinate the impacts of change requests on commonality and variability 27
8.3.4 Verify conformance among relevant configurations in time and space 27
8.3.5 Trace and manage approved changes to baselines 28
8.4 Traceability management for product line configuration 28
8.4.1 Principal constituents 28
8.4.2 Establish bi-directional traceability among PL configurations 29
8.4.3 Track and control PL configuration with commonality and variability 29
8.4.4 Facilitate integrated traceability management for PL configuration and PL configuration delta 30

Annex A (informative) Roles of configuration management in each SSPL lifecycle process 31

Bibliography 33
