

ISO/IEC TR 6114:2023-10 (E)

Cybersecurity - Security considerations throughout the product life cycle

Contents		Page
Foreword.....		v
Introduction.....		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	2
5	Security considerations throughout the product life cycle	3
5.1	Security considerations throughout the product life cycle overview.....	3
5.2	Information and communication technology threat model.....	5
5.3	Classes of threats.....	5
5.4	Structure of the report.....	5
6	Phase 1: Concept	6
6.1	General.....	6
6.2	Summary of concept threats and controls.....	6
6.2.1	Workflow toolchain tampering.....	6
6.2.2	Unauthorized operations.....	7
6.2.3	Integrity faults.....	7
6.2.4	Theft or loss.....	7
7	Phase 2: Development	7
7.1	General.....	7
7.2	Summary of development threats and controls.....	7
7.2.1	Attacks on development tools and/or network.....	7
7.2.2	Malicious embedded firmware.....	7
7.2.3	Malicious hardware.....	8
7.2.4	Malicious software (driver).....	8
7.2.5	Counterfeit.....	8
8	Phase 3: Source and manufacture	9
8.1	General.....	9
8.2	Source.....	9
8.3	Manufacture.....	9
8.4	Summary of production threats and controls.....	9
8.4.1	Attack on production tools, data exchange tools and/or network.....	9
8.4.2	Unauthorized disclosure.....	9
8.4.3	Reverse engineering / theft of design.....	10
8.4.4	Improper system settings.....	10
8.4.5	Design alteration.....	10
8.4.6	Insertion of malicious and/or counterfeit components.....	10
8.4.7	Falsification of test results.....	11
8.4.8	Product theft.....	11
8.4.9	Code insertion or replacement (firmware, operating system, software).....	11
8.4.10	System replacement (spoof device).....	11
9	Phase 4: Transport	12
9.1	General.....	12
9.2	Summary of production threats and controls.....	12
9.2.1	Product theft.....	12

9.2.2	Code insertion or replacement (firmware, operating system, software)	12
9.2.3	Insertion of malicious components	12
9.2.4	System replacement (spoof device)	12
9.2.5	Physical attack in storage and transit	12
10	Phase 5: Utilization and support	12
10.1	General	12
10.2	Provision	13
10.3	Utilization	13
10.4	Support	13
10.5	Summary of utilization threats and controls	13
10.5.1	Unknown provenance	13
10.5.2	Spoofed system (replaced system)	13
10.5.3	Undetected tampering	14
10.5.4	Build data store tampering	14
10.5.5	Non-current device/product (firmware, operation system, application, drivers)	14
10.5.6	Unauthorized changes (firmware, operating system, software)	14
10.5.7	Unauthorized component swap	14
10.5.8	Insertion or replacement with malicious component	15
10.5.9	Product data store tampering	15
11	Phase 6: Retirement	15
11.1	General	15
11.2	Summary of retirement threats and controls	15
11.2.1	Inaccurate hardware return	15
11.2.2	Incomplete data removal	16
Annex A (informative) Product security threat mapping to SCLC phases		17
Annex B (informative) Typical threats for hardware		21
Annex C (informative) Typical threats for software		30
Annex D (informative) Typical threats for data		36
Annex E (informative) Use of tagalongs		40
Annex F (informative) Software tampering		41
Bibliography		44
