|-----------------|--|-------------|
| Foreword        |  | vi          |
| Introduction    |  | vii         |
| <b>1</b>        | <b>Scope</b>                                     | <b>1</b>    |
| <b>2</b>        | <b>Normative references</b>                      | <b>1</b>    |
| <b>3</b>        | <b>Terms, definitions, symbols and functions</b> | <b>1</b>    |
| 3.1             | Terms and definitions                            | 1           |
| 3.2             | Symbols and functions                            | 2           |
| 3.2.1           | Mathematical symbols                             | 2           |
| 3.2.2           | Mathematical functions and operations            | 2           |
| <b>4</b>        | <b>Symbology characteristics</b>                 | <b>3</b>    |
| 4.1             | Basic characteristics                            | 3           |
| 4.2             | Summary of additional features                   | 3           |
| <b>5</b>        | <b>Symbol description</b>                        | <b>4</b>    |
| 5.1             | Basic Aztec Code properties                      | 4           |
| 5.2             | Symbol structure                                 | 4           |
| 5.2.1           | Aztec code layout                                | 4           |
| 5.2.2           | Core Symbol                                      | 6           |
| 5.2.3           | Data fields                                      | 7           |
| 5.3             | Symbol character structure and sequence          | 7           |
| 5.4             | Symbol size and capacity                         | 9           |
| <b>6</b>        | <b>General encodation procedures</b>             | <b>10</b>   |
| <b>7</b>        | <b>Symbol structure</b>                          | <b>11</b>   |
| 7.1             | Fixed pattern structures                         | 11          |
| 7.1.1           | Fixed pattern types                              | 11          |
| 7.1.2           | Finder   | 11          |
| 7.1.3           | Orientation bits                                 | 11          |
| 7.1.4           | Reference grid                                   | 11          |
| 7.2             | Mode message encoding and structure              | 11          |
| 7.2.1           | Mode message                                     | 11          |
| 7.2.2           | Symbol size designator                           | 11          |
| 7.2.3           | Message length designator                        | 12          |
| 7.2.4           | Error encodation for the mode message            | 12          |
| 7.2.5           | Module placement for the mode message            | 12          |
| 7.3             | Data message encoding and structure              | 12          |
| 7.3.1           | Data message                                     | 12          |
| 7.3.2           | Source message encoding                          | 13          |
| 7.3.3           | Error encodation for the data message            | 15          |
| 7.3.4           | Module placement for the data message            | 15          |
| <b>8</b>        | <b>Structured Append</b>                         | <b>16</b>   |
| <b>9</b>        | <b>Reader initialization symbols</b>             | <b>16</b>   |
| <b>10</b>       | <b>Extended Channel Interpretation (ECI)</b>     | <b>16</b>   |
| 10.1            | ECI basic information and references             | 16          |
| 10.2            | Encoding ECIs in Aztec Code                      | 17          |
| 10.3            | Code sets and ECIs                               | 17          |
| 10.4            | ECIs and Structured Append                       | 17          |
| 10.5            | Post-decode protocol                             | 17          |

|           |  |           |
|-----------|--|-----------|
| <b>11</b> | <b>User considerations</b> .....                                       | <b>17</b> |
| 11.1      | Choice of data and error correction level.....                         | 17        |
| 11.2      | User selection of encoded message.....                                 | 17        |
| 11.3      | User selection of minimum error correction level.....                  | 18        |
| 11.4      | User selection of Structured Append.....                               | 18        |
| 11.5      | User selection of optional symbol formats.....                         | 18        |
| <b>12</b> | <b>Dimensions</b> .....  | <b>18</b> |
| <b>13</b> | <b>User guidelines</b> .....   | <b>18</b> |
| 13.1      | Human readable interpretation.....                                     | 18        |
| 13.2      | Autodiscrimination capability.....                                     | 19        |
| 13.3      | User-defined application parameters.....                               | 19        |
| <b>14</b> | <b>Reference decode algorithm</b> .....                                | <b>19</b> |
| 14.1      | General.....   | 19        |
| 14.2      | Finding candidate symbols.....   | 20        |
| 14.3      | Processing the bullseye image.....                                     | 20        |
| 14.4      | Decoding the Core Symbol.....  | 20        |
| 14.4.1    | Bullseye mapping of module centres.....                                | 20        |
| 14.4.2    | Mapping and sampling module centres.....                               | 20        |
| 14.4.3    | Determining video sign and symbol format.....                          | 21        |
| 14.4.4    | Determining symbol orientation and mirror image reversal.....          | 21        |
| 14.4.5    | Decoding the mode message.....   | 21        |
| 14.5      | Decoding the data message.....   | 21        |
| 14.5.1    | General.....   | 21        |
| 14.5.2    | Mapping the data layers.....   | 21        |
| 14.5.3    | Assembling the codewords.....  | 21        |
| 14.5.4    | Checking the codewords.....  | 22        |
| 14.6      | Translating the datawords.....   | 22        |
| 14.6.1    | Bit stream conversion and interpretation.....                          | 22        |
| 14.6.2    | Creating the data bit stream.....                                      | 22        |
| 14.6.3    | Interpreting the bit stream.....                                       | 22        |
| <b>15</b> | <b>Symbol quality</b> .....  | <b>22</b> |
| 15.1      | Quality assessment method.....   | 22        |
| 15.2      | Symbol quality parameters.....   | 22        |
| 15.2.1    | Fixed pattern damage (FPD).....  | 22        |
| 15.2.2    | Axial non-uniformity (AN).....   | 23        |
| 15.2.3    | Unused error correction.....   | 23        |
| 15.2.4    | “Print” growth.....  | 23        |
| 15.2.5    | Grid non-uniformity.....   | 23        |
| 15.3      | Symbol print quality grading.....                                      | 23        |
| 15.3.1    | Symbol grade.....  | 23        |
| 15.4      | Additional print process control measurements.....                     | 23        |
| <b>16</b> | <b>Transmitted data</b> .....  | <b>23</b> |
| 16.1      | Basic interpretation.....  | 23        |
| 16.2      | Protocol for FNC1.....   | 24        |
| 16.3      | Protocol for ECIs.....   | 24        |
| 16.4      | Symbology identifier.....  | 24        |
| 16.5      | Transmitted data example.....  | 24        |
|           | <b>Annex A (normative) Aztec Runes</b> .....                           | <b>26</b> |
|           | <b>Annex B (normative) Error detection and correction</b> .....        | <b>28</b> |
|           | <b>Annex C (normative) Topological bullseye search algorithm</b> ..... | <b>31</b> |
|           | <b>Annex D (normative) Linear crystal growing algorithm</b> .....      | <b>35</b> |
|           | <b>Annex E (normative) Fixed pattern damage (FPD) grading</b> .....    | <b>36</b> |
|           | <b>Annex F (normative) Symbology identifiers</b> .....                 | <b>38</b> |
|           | <b>Annex G (informative) Aztec Code symbol encoding example</b> .....  | <b>39</b> |
|           | <b>Annex H (informative) Achieving minimum symbol size</b> .....       | <b>43</b> |
|           | <b>Annex I (informative) Useful process control techniques</b> .....   | <b>46</b> |
|           | <b>Bibliography</b> .....  | <b>48</b> |
