

ISO/IEC 5152:2024-07 (E)

Information technology - Biometric performance estimation methodologies using statistical models

Contents

Page

- Foreword.....iv
- Introductionv
- 1 Scope 1
- 2 Normative references 1
- 3 Terms and definitions 1
- 4 Symbols and abbreviated terms 2
- 5 Conformance 2
- 6 Details of estimation 2
 - 6.1 Estimation of biometric performance based on extreme value theory 2
 - 6.2 Estimation design 3
 - 6.3 Generalized extreme value distribution 3
 - 6.4 Generalized Pareto distribution 5
 - 6.5 Evaluation of the fitness of the model 7
 - 6.6 Selection of rGEV and GP 8
 - 6.6.1 Differences between the two methodologies 8
 - 6.6.2 Features of the two methodologies 9
- 7 Performance metrics 9
- 8 Record keeping 10
- 9 Reporting estimation results 10
 - 9.1 Reporting one-to-one comparison performance 10
 - 9.2 Reporting estimation results 10
 - 9.3 Reporting form 11
- Annex A (informative) Extreme value theory 13
- Annex B (informative) Examples applied to multiple modality datasets to demonstrate the validity of the methodology 18
- Bibliography 25
