Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **2**

4 Conformance **4**

5 Planning the evaluation **4**

5.1 Identifying the scope of the evaluation 4

5.2 Demographic variables 5

5.2.1 Ground truth requirements 5

5.2.2 Categorical demographic variables 5

5.2.3 Continuous demographic variables 7

5.2.4 Other demographic variables 8

6 Executing the evaluation **8**

6.1 Generation of mated comparison and identification trials 8

6.2 Generation of non-mated comparison and identification trials 8

6.2.1 General 8

6.2.2 Verification (1:1) 8

6.2.3 Identification (1:N) 8

6.3 Selection of a threshold 9

6.4 Calculating differential performance based on categorical variables for two specific demographic groups 9

6.4.1 General 9

6.4.2 Differential performance between two groups based on mathematical difference 9

6.4.3 Differential performance between two groups based on mathematical ratio 10

6.5 Calculating differential performance based on categorical variables for more than two groups 10

6.5.1 General 10

6.5.2 Differential performance for more than two groups based on the largest error rate relative to the geometric mean 10

6.5.3 Differential performance for more than two groups based on the Gini coefficient 11

6.6 Calculating differential performance in identification trials 11

6.7 Calculating demographic differentials for failure-to-enrol rate, failure-to-acquire rate and transaction duration 12

6.8 Calculating demographic differentials for continuous variables 12

6.9 Comparison score differential measures 13

6.10 Calculating uncertainty 14

6.10.1 Uncertainty in demographic differentials 14

6.10.2 Sampling the target population 14

6.10.3 Sample size requirements 15

7 Reporting the evaluation results **16**

7.1 Reporting the experimental design 16

7.2 Reporting the target application 16

7.3 Reporting the test population 16

7.4 Reporting differential performance 17

7.4.1 Reporting differential performance on previously collected datasets. 17

7.4.2 Reporting differential performance for two or more groups 17

7.4.3 Reporting differential performance against a benchmark 18
7.4.4 Reporting error trade-off metrics 18
7.4.5 Reporting threshold management policy 18
7.5 Reporting comparison score differential measures 18
7.6 Reporting exception handling 19
Annex A (informative) **Example of estimating sample size for differential performance** **20**
Annex B (informative) **Calculating aggregate equitability measures** **23**
Bibliography **25**
