

ISO/IEC TS 18661-5:2025-03 (E)

Programming languages, their environments, and system software interfaces - Floating-point extensions for C - Part 5: Supplementary attributes

Contents

Page

Foreword.....	iv
Introduction.....	v
1 Scope.....	1
2 Normative references.....	1
3 Terms and definitions.....	1
4 Conformance.....	1
5 C standard conformance.....	2
5.1 Freestanding implementations.....	2
5.2 Predefined macros.....	2
5.3 Standard headers.....	2
6 Standard pragmas.....	2
7 Evaluation formats.....	3
7.1 General.....	3
7.2 Evaluation method pragma.....	3
7.3 Evaluation method pragma for decimal floating types.....	4
7.4 Effective evaluation method macros.....	4
7.5 Evaluation type macros.....	4
7.6 Evaluation formats for <tgmath.h>.....	5
8 Optimization controls.....	5
8.1 General.....	5
8.2 The FP_ALLOW_VALUE_CHANGING_OPTIMIZATION pragma.....	6
8.3 The FP_ALLOW_ASSOCIATIVE_LAW pragma.....	6
8.4 The FP_ALLOW_DISTRIBUTIVE_LAW pragma.....	7
8.5 The FP_ALLOW_MULTIPLY_BY_RECIPROCAL pragma.....	7
8.6 The FP_ALLOW_ZERO_SUBNORMAL pragma.....	8
8.7 The FP_ALLOW_CONTRACT_FMA pragma.....	8
8.8 The FP_ALLOW_CONTRACT_OPERATION_CONVERSION pragma.....	9
8.9 The FP_ALLOW_CONTRACT pragma.....	9
9 Reproducibility.....	10
9.1 General.....	10
9.2 The FP_REPRODUCIBLE pragma.....	10
9.3 Reproducible code.....	11
10 Alternate exception handling.....	12
10.1 General.....	12
10.2 The FENV_EXCEPT pragma.....	13
Bibliography.....	20
