ISO/IEC TS 19770-10:2025-06 (E)

Information technology - IT asset management - Part 10: Guidance for implementing ITAM

Contents

Page

Foreword ..... **vi**

Introduction ..... **vii**

1 Scope **1**

2 Normative references **2**

3 Terms and definitions **2**

4 Possible terminology issues **5**

5 The ever-evolving world of ITAM **6**

6 Negative mindset issues for implementing IT asset management **8**

7 Selling the value of IT asset management **11**
7.1 Building the business case 11
7.2 Alignment to key stakeholders 12
7.3 Visibly maintaining value for the organization 13

8 Approaches to implementing IT asset management **14**
8.1 Evaluation of current vs desired state 14
8.2 Big bang vs incremental 16
8.3 Waterfall vs adaptive approaches 16
8.4 Strategic decisions concerning mix of do-it-yourself and consultant-assisted 17
8.5 Strategic technology platform decisions 17
8.6 Where to start with implementation 18

9 Implementation scenarios **19**
9.1 General 19
9.2 The impact of the evolution of the organization's other management systems 20
9.3 Organizational scenarios 22
9.3.1 General 22
9.3.2 Culture and level of management support 22
9.3.3 Degree of centralization or decentralization 23
9.3.4 Size and complexity of organization 24
9.3.5 General legal requirements and international presence 25
9.3.6 Industry verticals 26
9.3.7 Departmental ITAM issues 27
9.3.8 New organizational models such as product-based using agile/DevOps 28
9.3.9 ITAM system scope 29
9.3.10 Other frameworks being used within the organization 30
9.3.11 Outsourcing and services 31
9.3.12 Stakeholder engagement and management 32
9.4 ITAM technology scenarios 33
9.4.1 General 33
9.4.2 Technology risk overview 33
9.4.3 Technology opportunity overview 34
9.4.4 Emerging technologies 36
9.4.5 Technology scenario examples 37
9.5 Change scenarios 45
9.5.1 General 45
9.5.2 Changed business models 45
9.5.3 Changed market conditions 46

9.5.4 Mergers, acquisitions and divestitures 47
9.5.5 Changes to the IT operating model 47
9.5.6 Technology migration 48
9.5.7 Major integration with security and/or service management 49

10 Management system processes 50
10.1 General 50
10.2 Understanding the external context and stakeholder needs 50
10.3 Leadership, policy and organization 50
10.3.1 Leadership 50
10.3.2 Policy 51
10.3.3 Organizational roles, responsibilities and authorities 52
10.3.4 Mixed responsibilities between the organization and its personnel 53
10.4 Establishing and maintaining the management system 53
10.4.1 Scoping 53
10.4.2 Information requirements 55
10.4.3 Documented information 56
10.4.4 Implementation 57
10.5 Planning (including risk assessment) 57
10.5.1 Actions to address risks and opportunities for the IT asset management system 57
10.5.2 IT asset management objectives and planning to achieve them 58
10.6 Supporting management system processes 58
10.6.1 Resources 58
10.6.2 Competence 60
10.6.3 Awareness 61
10.6.4 Communication 62
10.7 Executing functional and lifecycle processes 62
10.8 Performance evaluation and improvement 64

11 Functional management processes 66
11.1 General 66
11.2 Change management 66
11.3 License management 68
11.4 Security management 69
11.5 Relationship and contract management 70
11.6 Financial management 72
11.7 Service level management 74
11.8 Other risk management 75

12 Life cycle processes 76
12.1 General 76
12.2 Specification 76
12.3 Acquisition 78
12.4 Development 79
12.5 Release 80
12.6 Deployment 82
12.7 Operation 82
12.8 Retirement 83

13 ITAM data 86
13.1 General 86
13.2 Data governance 87
13.3 Data management roles and data ownership 87
13.4 Data model 90
13.5 Data model management 91
13.6 Process integrations 91
13.7 Database and systems integration 92
13.8 Data validation 94
13.9 Data lifecycle management 94

14 Special topics 95
14.1 Assessments 95
14.2 Sustainability 96

14.3 Tool and technology selection 97
14.4 Roles and responsibilities 99
14.5 Dimensions for analysis and planning 100
14.6 Interfaces for analysis and planning 101
14.7 Sources of additional guidance 101

Annex A (informative) **Expected levels of ITAM understanding** **103**

Annex B (informative) **Overview of ISO/IEC 19770-1:2017** **109**

Annex C (informative) **Overview of related standards** **116**

Annex D (informative) **Checklists** **119**

Annex E (informative) **Basic improvement implementation plan** **122**

Annex F (informative) **Asset lifecycle stage suggestions** **124**

Annex G (informative) **Documented information references in ISO/IEC 19770-1:2017** **126**

Annex H (informative) **Metrics** **128**

Annex I (informative) **OTAM and ITAM** **132**

Annex J (informative) **Cross-references with ISO ITAM** **134**

Bibliography **143**
