Internet of Things (IoT) - Functional requirements to determine the status of self-quarantine through Internet of Things data interfaces

Contents	Page
FOREWORD.....	3
INTRODUCTION.....	4
1 Scope.....	5
2 Normative references.....	5
3 Terms and definitions	5
4 Abbreviated terms	7
5 Functional entities	7
5.1 General.....	7
5.2 Mandatory functional entity.....	8
5.3 Optional functional entities	8
6 Functional requirements and provisions	9
6.1 General.....	9
6.2 Provisions for monitoring entity.....	9
6.3 Provisions for monitoring tag	10
6.4 Requirements and provisions for proxy managing entity	11
6.5 Requirements and provisions for managing entity	12
6.6 Requirements and provisions for the protection of data and privacy.....	12
Annex A (informative) Reference configurations of functional entities.....	14
A.1 General.....	14
A.2 Reference configurations.....	14
A.2.1 Four realized functional elements	14
A.2.2 Peer-to-peer self-quarantine management scheme	14
A.2.3 Three-tier self-quarantine management scheme.....	15
A.2.4 Four-tier self-quarantine management scheme	15
A.3 Reference interface relations.....	16
Annex B (informative) Self-quarantine management model	18
B.1 General.....	18
B.2 Management levels	18
B.2.1 General	18
B.2.2 Level 0: No self-quarantine and no management.....	18
B.2.3 Level 1: Voluntary self-quarantine and no management	18
B.2.4 Level 2: Instructed self-quarantine and passive management.....	18
B.2.5 Level 3: Instructed self-quarantine and active management.....	19
B.2.6 Level 4: Instructed self-quarantine and tag-based active management	19
B.3 Application guidelines	19
Annex C (informative) Use-case scenarios	21
Annex D (informative) Ethical considerations	23
D.1 General.....	23
D.2 Local laws and regulations	23

D.3	Consideration of personal circumstances of a self-quarantined individual	23
D.4	Ethical care of co-residents of self-quarantined individuals.....	24
D.5	Transparency, accuracy, and respect in communications to the public.....	24
D.6	Moral integrity and appropriate level of competence.....	25
D.7	Private sector participation	25
D.8	Research for the effectiveness and impact of the self-quarantine management process	26
Annex E (informative)	Development cases of self-quarantine management	27
Bibliography	30
Figure 1	– Reference configuration topology for self-quarantine management entities	8
Figure A.1	– Peer-to-peer self-quarantine management through remote monitoring	14
Figure A.2	– Tag-based three-tier self-quarantine management through remote monitoring for more managed self-quarantine.....	15
Figure A.3	– Proxy-based three-tier self-quarantine management through remote monitoring for distributed management.....	15
Figure A.4	– Four-tier self-quarantine management through remote monitoring	16
Figure A.5	– Reference interface relations.....	16
Table E.1	– Development cases of self-quarantine management.....	27
