European foreword	5
Introduction	6
1 Scope	7
2 Normative references	7
3 Terms and definitions	7
3.1 Organizations and institutions	7
3.2 Project names	8
3.3 Space terms and abbreviations	8
3.3.1 Space abbreviations	8
3.3.2 Space terms	8
3.4 Quantum communication terms and abbreviations	9
3.4.1 Quantum communication abbreviations	9
3.4.2 Quantum communication terms	9
3.5 Abbreviated terms	10
4 Roadmap on post-processing	10
4.1 General	10
4.2 Quantum technology	11
4.2.1 Introduction	11
4.2.2 Quantum key distribution	11
4.2.3 QKD network and layers	11
4.2.4 Quantum communications infrastructure	11
4.2.5 Technology developments for space	12
4.2.6 Space missions	12
4.3 Standardization background	13
4.3.1 Introduction	13
4.3.2 Standard developing organizations	13
4.3.3 The Rolling Plan	14
4.3.4 Standardization in space	14
4.3.5 Standardization roadmap on quantum technologies	14
4.3.6 QKD standard categories	14
4.4 Post-processing software standardization	15
5 Post-processing architecture in space	15
5.1 General	15
5.2 QKD protocols	16
5.2.1 Introduction	16
5.2.2 PMS-based QKD protocol entities	16
5.2.3 EPS-based QKD protocol entities	17
5.3 Space-based QKD system	17
5.3.1 Introduction	17
5.3.2 Space segment	18
5.3.3 Ground segment	18
5.3.4 Launch and support segment	18
5.3.5 User segment	18
5.3.6 Orbits and constellations	18
5.4 General PPSW architecture	19
5.4.1 PPSW overview	19
5.4.2 Identified PPSW items	19

5.4.3	PPSW product assurance	20
5.4.4	PPSW security	20
5.4.5	PPSW resources	20
5.5	PMS-PPSW architecture	21
5.5.1	PMS-PPSW overview	21
5.5.2	PMS-PPSW configuration	21
5.5.3	PMS-PPSW static design	21
5.5.4	PMS-PPSW dynamic design	21
5.5.5	PMS-PPSW external interfaces	22
5.5.6	PMS-PPSW resources	22
5.6	EPS-PPSW architecture	22
5.6.1	EPS-PPSW overview	22
5.6.2	EPS-PPSW configuration	22
5.6.3	EPS-PPSW static design	23
5.6.4	EPS-PPSW dynamic design	23
5.6.5	EPS-PPSW external interfaces	24
5.6.6	EPS-PPSW resources	24
6	PPSW functional blocks	24
6.1	General	24
6.2	Functional blocks	24
6.2.1	Overview	24
6.2.2	PMS-based QKD transmitter (PMS-QKD-Tx)	24
6.2.3	EPS-based QKD transmitter (EPS-QKD-Tx)	25
6.2.4	QKD receiver (QKD-Rx)	25
6.2.5	Key manager (KM)	25
6.3	Information flow	25
6.3.1	Overview	25
6.3.2	Raw data	25
6.3.3	Sifting	25
6.3.4	Parameter estimation	25
6.3.5	Information reconciliation	25
6.3.6	Privacy amplification	25
6.3.7	Secure key material	25
6.4	Interfaces	25
6.4.1	Overview	25
6.4.2	Quantum channel	26
6.4.3	Classical channel	26
7	Identification of the HW components in the functional blocks	27
7.1	General	27
7.2	On-board computer	27
7.3	Random number generator	27
7.4	Key management	27
7.5	Prepare and measure source	27
7.6	Entangled photon pair source	27
7.7	QKD Receiver	27
8	Mapping HW to SW items for standardization needs	27
8.1	General	27
8.2	HW items	28
8.3	SW items	28
8.4	Mapping	28
9	PPSW standardization in space	28
9.1	General	28
9.2	Components and interfaces	29
9.3	Standardization plan and priorities	29
9.4	Roadmap on PPSW in space	31
9.4.1	Projected standards	31
9.4.2	Existing standards	32
9.4.3	Considerations	34
9.4.4	Gaps	35
Annex A	(informative) European regulations and directives	37

A.1	General	37
A.2	Cybersecurity Act 2	38
A.3	Quantum Act	38
A.4	Chips Act	38
A.5	Chips Joint Undertaking	39
Annex B	(informative) European space programme	40
Annex C	(informative) European projects and calls	41
C.1	General	41
C.2	Union secure connectivity programme	41
C.3	EuroQCI	42
C.4	QuantERA	42
C.5	LaiQa project	43
C.6	QuTechSpace project	43
C.7	Standards for quantum technologies	43
C.8	Quantum communication	44
Annex D	(informative) Standardization Roadmap on QT	47
Annex E	(informative) Quantum technology SDOs	48
E.1	General	48
E.2	Identified SDOs	48
E.3	Global SDOs	49
E.4	European SDOs	50
E.5	National SDOs	51
Annex F	(informative) Identified standards	52
F.1	General	52
F.2	CEN/CENELEC standards	52
F.3	ECSS standards	52
F.4	ETSI standards	52
F.5	IEEE standards	53
F.6	EN ISO/IEC and ISO/IEC standards	54
F.7	ITU-T standards	55
Annex G	(informative) Computer resources in space	57
Bibliography		58
