

# ISO/IEC/IEEE 8802-A:2026-08 (E)

## Information technology - Telecommunications and information exchange between systems - Local and metropolitan area networks - Part A: Overview and architecture

---

| Contents                                                        | Page |
|-----------------------------------------------------------------|------|
| 1. Overview .....                                               | 16   |
| 1.1 Scope.....                                                  | 16   |
| 1.2 Purpose.....                                                | 16   |
| 1.3 Word usage .....                                            | 16   |
| 2. Normative references.....                                    | 17   |
| 3. Definitions, acronyms, and abbreviations.....                | 18   |
| 3.1 Definitions .....                                           | 18   |
| 3.2 Acronyms and abbreviations .....                            | 20   |
| 4. Family of IEEE 802 standards .....                           | 23   |
| 4.1 Key concepts.....                                           | 23   |
| 4.2 Application and support.....                                | 24   |
| 4.3 An international family of standards .....                  | 25   |
| 4.4 IEEE 802 standards.....                                     | 25   |
| 5. Reference models (RMs) .....                                 | 27   |
| 5.1 Introduction.....                                           | 27   |
| 5.2 RM description for end stations.....                        | 28   |
| 5.2.1 SAPs.....                                                 | 29   |
| 5.2.2 LLC sublayer .....                                        | 29   |
| 5.2.3 MAC sublayer.....                                         | 29   |
| 5.2.4 PHY .....                                                 | 30   |
| 5.2.5 Layer and sublayer management .....                       | 30   |
| 5.3 Interconnection and interworking.....                       | 30   |
| 5.3.1 Interconnection at the PHY.....                           | 31   |
| 5.3.2 MAC-sublayer interconnection: Bridges .....               | 31   |
| 5.3.3 Network-layer interconnection: Routers.....               | 35   |
| 6. General requirements for an IEEE 802 network.....            | 36   |
| 6.1 Services supported .....                                    | 36   |
| 6.2 Error ratios .....                                          | 36   |
| 7. IEEE 802 network management .....                            | 37   |
| 7.1 General.....                                                | 37   |
| 7.2 General-purpose IEEE 802 network management.....            | 37   |
| 7.2.1 Management functions.....                                 | 37   |
| 7.2.2 Management architecture.....                              | 37   |
| 7.2.3 Managed object definitions.....                           | 38   |
| 7.3 Special-purpose IEEE 802 network management standards ..... | 38   |
| 8. MAC addresses .....                                          | 39   |
| 8.1 Terms and notational conventions .....                      | 39   |
| 8.2 Universal addresses.....                                    | 39   |

|       |                                                                              |    |
|-------|------------------------------------------------------------------------------|----|
| 8.2.1 | Concept and overview .....                                                   | 39 |
| 8.2.2 | Assignment of universal addresses .....                                      | 40 |
| 8.2.3 | Assignment by organizations .....                                            | 42 |
| 8.2.4 | Uniqueness of address assignment .....                                       | 42 |
| 8.3   | Interworking with 48-bit and 64-bit MAC addresses .....                      | 42 |
| 8.4   | Local MAC addresses .....                                                    | 43 |
| 8.4.1 | Concept and overview .....                                                   | 43 |
| 8.4.2 | Local MAC address assignment protocols .....                                 | 43 |
| 8.4.3 | Structured Local Address Plan (SLAP) .....                                   | 43 |
| 8.4.4 | SLAP local identifier types .....                                            | 45 |
| 8.4.5 | Network Unique Identifier (NUI) .....                                        | 48 |
| 8.5   | Group MAC addresses .....                                                    | 48 |
| 8.6   | Bit-ordering within octets .....                                             | 48 |
| 9.    | Protocol identifiers and context-dependent identifiers .....                 | 49 |
| 9.1   | Introduction .....                                                           | 49 |
| 9.2   | EtherTypes and E-Type protocol identifiers .....                             | 50 |
| 9.2.1 | Format, function, and administration .....                                   | 50 |
| 9.2.2 | Public EtherType assignments subset .....                                    | 50 |
| 9.2.3 | EtherType sub-protocol encoding .....                                        | 51 |
| 9.2.4 | Local Experimental EtherTypes .....                                          | 52 |
| 9.3   | LSAP addresses and L-Type protocol identifiers .....                         | 53 |
| 9.4   | O-Type protocol identifiers .....                                            | 53 |
| 9.5   | PIF encoding .....                                                           | 53 |
| 9.5.1 | Type 2 PIF encoding .....                                                    | 53 |
| 9.5.2 | Type 3 PIF encoding .....                                                    | 54 |
| 9.5.3 | Encoding type and PIF length .....                                           | 56 |
| 9.6   | Context-dependent identifiers .....                                          | 56 |
| 10.   | Allocation of OID values in IEEE 802 standards .....                         | 57 |
| 10.1  | General .....                                                                | 57 |
| 10.2  | OIDs and ISO standards .....                                                 | 57 |
| 10.3  | The OID hierarchy for IEEE 802 standards .....                               | 58 |
| 10.4  | The OID hierarchy under iso(1) std(0) iso8802(8802) .....                    | 59 |
| 10.5  | Migration from previous OID allocations .....                                | 59 |
| 11.   | Allocation of Uniform Resource Name (URN) values in IEEE 802 standards ..... | 60 |
| 11.1  | Introduction .....                                                           | 60 |
| 11.2  | IEEE Namespace ID and Namespace Specific String .....                        | 60 |
| 11.3  | ResourceSpecificString values in IEEE 802 standards .....                    | 60 |
|       | Annex A (informative) Bibliography .....                                     | 62 |
|       | Annex B (informative) Reference models for IEEE 802 standards .....          | 64 |
| B.1   | IEEE 802.3 reference models .....                                            | 64 |
| B.2   | IEEE 802.11 reference model .....                                            | 66 |
| B.3   | IEEE 802.15™ reference models .....                                          | 68 |
| B.3.1 | IEEE 802.15.3™ RM .....                                                      | 68 |
| B.3.2 | IEEE 802.15.4™ RM .....                                                      | 70 |
| B.3.3 | IEEE 802.15.6™ RM .....                                                      | 70 |

|                                                                    |                                                     |    |
|--------------------------------------------------------------------|-----------------------------------------------------|----|
| B.3.4                                                              | IEEE 802.15.7™ RM.....                              | 70 |
| B.4                                                                | IEEE 802.16™ reference model.....                   | 71 |
| B.4.1                                                              | Protocol RM.....                                    | 71 |
| B.4.2                                                              | Network RM .....                                    | 72 |
| B.5                                                                | IEEE 802.21™ reference model.....                   | 73 |
| B.6                                                                | IEEE 802.22™ reference model.....                   | 74 |
| B.6.1                                                              | Data plane .....                                    | 75 |
| B.6.2                                                              | Management/control plane .....                      | 75 |
| B.6.3                                                              | Cognitive plane .....                               | 75 |
| Annex C (informative) Examples of bit ordering for addresses ..... |                                                     | 76 |
| Annex D (informative) List of IEEE 802 standards .....             |                                                     | 77 |
| Annex E (informative) History .....                                |                                                     | 79 |
| E.1                                                                | Universal addresses.....                            | 79 |
| E.2                                                                | IEEE RA address block products.....                 | 79 |
| E.3                                                                | Local MAC addresses .....                           | 80 |
| Annex F (informative) EtherType listing subset .....               |                                                     | 81 |
| F.1                                                                | Introduction.....                                   | 81 |
| F.2                                                                | Tabular format .....                                | 81 |
| F.3                                                                | YANG module for EtherType subset .....              | 84 |
| F.3.1                                                              | YANG framework .....                                | 84 |
| F.3.2                                                              | Definition for ieee802-ethertype YANG module' ..... | 85 |
| Annex G (informative) Wake-on-LAN .....                            |                                                     | 97 |
