

ISO/TR 16066:2003-03 (E)

Graphic technology - Standard object colour spectra database for colour reproduction evaluation (SOCS)

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Standard object colour spectra	1
2.1	Object categories and sample selection	1
2.2	Typical set samples and difference set samples	4
3	Use of the colour spectra database	5
3.1	Use of typical sets	5
3.2	Use of difference sets	7
4	Permissions	8
Annex A (informative) Spectral reflectance and transmittance source data		9
Annex B (normative) Typical set selection method for artificial colour groups		27
Annex C (normative) Typical set selection method for non-skin colour, natural colour groups		29
Annex D (normative) Typical set selection method for skin groups		31
Annex E (normative) Difference set selection method		32
Annex F (informative) Correspondence between typical/difference samples and original collected data samples		33
