ISO 8571-3:1988-10 (E)

Information processing systems; Open Systems Interconnection; file transfer, access and management; Part 3: File service definition

Contents

Page

0 Introduction 1

1 Scope and field of application 1

2 References 1

3 Definitions 2

4 Abbreviations 2

5 Conventions 2

Section one: General

6 Model of the file Service 3
6.1 File Service provider and file Service users 3
6.2 File Service levels 3
6.3 Regimes of the file Service 4

7 Services of the file Service 4
7.1 FTAM regime control 4
7.2 File store management 4
7.3 File selection regime control 4
7.4 File management 5
7.5 File open regime control 5
7.6 Grouping control 5
7.7 Access to file content 5
7.8 Bulk data transfer 5
7.9 Recovery 5
7.10 Checkpointing and restarting 5

8 Functional units and Service classes 5
8.1 Functional units 5
8.2 Service classes 6
8.3 Application Entity roles 8

9 Levels of file Service 8

10 Negotiation of Service class, FTAM QoS and functional units 9
10.1 Service Class 9
10.2 FTAM Quality of Service 9
10.3 Functional units 9

Section two : Definition of file service primitives

11 File Service primitives 11

12 Sequences of primitives 11
12.1 Normal sequences 11
12.2 Constraints on the issue of primitives 11
12.3 Conventions 14

12.4 Confirmed Services 20

13 Common file Service parameters 20
13.1 State result 20
13.2 Action result 20
13.3 Account 20
13.4 Charging 20
13.5 Attributes 20
13.6 Requested access 20
13.7 Access Passwords 21
13.8 Concurrency Control 21
13.9 FADU Lock 21
13.10 Shared ASE Information 21
13.11 Activity Identifier 21
13.12 File Access Data Unit Identity 21
13.13 Diagnostic 22

14 FTAM regime control 23
14.1 FTAM regime establishment Service 23
14.2 FTAM regime termination service (orderly) 26
14.3 FTAM regime termination Service (abrupt) 26

15 File selection regime control 27
15.1 File selection Service 27
15.2 File deselection Service 28
15.3 File creation service 28
15.4 File deletion Service 30

16 File management 31
16.1 Read attribute service 31
16.2 Change attribute service 31

17 File open regime control 31
17.1 File open service 32
17.2 File dose service 33

18 Grouping control 34
18.1 Beginning of grouping Service 34
18.2 End of grouping Service 35

19 Recovery (Internal service only) 35
19.1 Regime recovery Service 35

20 Access to file contents 36
20.1 Bulk data transfer Service 36
20.2 Locate file access data unit service 36
20.3 Erase file access data unit service 37

Section three; Definition of bulk data transfer primitives

21 Bulk data transfer service primitives 38

22 Sequences of bulk data transfer primitives 38
22.1 Normal sequences 38
22.2 Constraints on issue of primitives 38

23 Common bulk data transfer parameters 44
23.1 Bulk Data Transfer Specification 44
23.2 Checkpoint Identifier 44

24 Bulk data transfer 44
24.1 Read bulk data Service 44
24.2 Write bulk data Service 44
24.3 Data unit transfer service 44
24.4 End of data transfer service 45
24.5 End of transfer service 45
24.6 Cancel data transfer service 45
24.7 Sequence of primitives on write 46
24.8 Sequence of primitives on read 46

25 Checkpointing and restart (Internal BOT Service Only) 46
25.1 Checkpointing service 46
25.2 Restarting data transfer service 47

Annexes

A Diagnostic parameter values 48

B Relation of attributes to primitives 53

C File transfer with commitment control 55

D Reference to FTAM control information 58

E State transition diagrams 59

Figures

1 Service Levels 3

2 File Service regimes and related primitives 4

3 Simplified State Diagram for successful activity (see Annex E) 13

4 Confirmed Service 20

5 F-U-ABORT Service 27

6 F-P-ABORT Service 27

7 F-P-ABORT collision 27

8 Simplified State Diagram for Bulk Data Transfer (see Annex E) 39

9 Sequence of primitives on write 46

10 Sequence of primitives on read 47

11 State Transition Diagram for Association Establishment (Initiator) 60

12 State Transition Diagram for Association Establishment (Responder) 61

13 State Transition Diagram of the File Regime Establishment Service (Initiator) 62

14 State Transition Diagram for Grouped Sequences (Initiator) 63

15 State Transition Diagram of the File Regime Establishment Service (Responder) 64

18 State Transition Diagram for Grouped Sequences (Responder) 65

17 State Transition Diagram for the Bulk Data Transfer Service (Initiator) 66

18 State Transition Diagram for the Bulk Data Transfer Service (Responder) 67

Tables

1 Services and functional units of the External File Service 7

2 Services and functional units of the Internal File Service 7

3 Functional units in the file services 9

4 Service Class Combinations 9

5 Service Class Negotiation 10

6 File Service primitives 11

7 Sequence of service primitives for FTAM regime establishment — Initiator 15

8 Sequence of service primitives for FTAM regime establishment — responder 15

9 Sequence of service primitives for file service regimes — Initiator 16

10 Sequence of service primitives for file service regimes — responder 18

11 F-INITIALIZE Parameters 24

12 F-TERMINATE parameters 26

13 F-U-ABORT parameters 26

14 F-P-ABORT parameters 26

15 F-SELECT parameters 27

16 F-DESELECT parameters 28

17 F-CREATE parameters 29

18 F-DELETE parameters 30

19 F-READ-ATTRIB parameters 31

20 F-CHANGE-ATTRIB parameters 32

21 F-OPEN parameters 32

22 F-CLOSE 34

23 F-BEGIN-GROUP parameters 35

24 F-RECOVER parameters 35

25 BDT read sub-parameters 36

26 BDT write sub-parameters 36

27 Access contexts 36

28 F-LCX5ATE parameters 37

29 F-ERASE Parameters 37
30 Bulk data transfer service primitives 38
31 Sequence of service primitives for bulk data transfer — Initiator 40
32 Sequence of service primitives for bulk data transfer — responder 42
33 F-READ parameters 44
34 F-WRITE Parameters 44
35 F-DATA Parameters 45
36 F-DATA-END parameters 45
37 F-TRANSFER-END Parameters 45
38 F-CANCEL parameters 46
39 F-CHECK parameters 47
40 F-RESTART parameters 47
41 Error types 48
42 Sources and observers of errors 48
43 General FTAM diagnostics 49
44 Protocol and supporting service related diagnostics 49
45 Association related diagnostics 50
46 Selection related diagnostics 50
47 File management related diagnostics 51
48 Access related diagnostics 51
49 Recovery related diagnostics 52
50 File attributes 53
51 Activity attributes 54
52 File Service primitives associated with CCR primitives 56
53 FTAM Primitives with Shared ASE Information parameters 56
54 Composite FTAM actions 57
