Foreword iv

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms, definitions, and abbreviated terms 2

4 Overview and Conventions 6
4.1 Overview of Digital Item Processing 6
4.3 Documentation conventions 7
4.4 Schema wrapper 8
4.5 Use of namespace prefixes 8

5 Digital Item Methods 9
5.1 Introduction 9
5.2 Digital Item Method Language 10
5.3 Digital Item Method linkage with DID 11
5.4 Digital Item Base Operations 21
5.5 Relation of Digital Item Base Operations and RDD verbs (informative) 56
5.6 Digital Item eXtension Operations 57
5.7 Auto run DIM 59

Annex A (normative) ECMAScript binding for Digital Item Base Operations 62

Annex B (normative) Java bindings for Digital Item Base Operations 64

Annex C (normative) Calling MPEG-J based DIXOs from DIMs 74

Annex D (informative) MPEG-J based model for execution of DIXOs 84

Annex E (informative) XML Schema Definition for Digital Item Processing Elements 85

Annex F (informative) A media handler implementation of play DIBO 87

Annex G (informative) Tracking DIM execution for consistent rights checks 94

Annex H (informative) Profiling DIP 97

Annex I (informative) Digital Item Method Use Case Scenarios and Examples 101
